B

At 6 in the afternoon on May 2, Yao and his team members were dressed in traditional Sichuan opera costumes (戏服) in a hot pot restaurant. They were ready to excite customers with their first face-changing show since the outbreak of COVID-9. They arrived three hours earlier to allow for preparations, as the moment they had been waiting for over the past four months finally came.

Their last performance (演出) was on ____1____ 2. All the costumes and props (道具) have been prepared for shows after the Spring Festival holiday, but the sudden epidemic ruined (破坏) all his plans. They were supposed to put on 36 performances during the Chinese Lunar New Year holiday season, but Yao kept ____2____ calls to tell him of cancelations.

For nearly two months, the teammates all stayed at home to ____3____ the COVID-9 infection and waited for work. In late March, when the spread began to become weaker, Yunnan province introduced a series of rules to ____4____ industries to restart work.

So Yao also started his new career, ____5____ a restaurant in Kunming, the provincial capital, in order to make ends meet. They didn't have any income (收入) from performing for months, and Yao had to find ways to make money since the team was ____6____ by him. The name of the restaurant is "Mian", which in Chinese means "noodles" or "face", showing his two roles—a face-changing ____7____ and a noodle restaurant owner. The restaurant is small with 0 tables crowded inside. On a table in the corner is displayed a set of livestreaming equipment. Yao is ____8____ sharing Sichuan opera and face-changing culture to his followers nationwide on livestreaming platforms.

To get prepared for the next stage, Yao asks his students to practice their operatic performances and ____9____ their moves to push them forward every day. "Although our performances have been influenced, the practice of face-changing can't stop, ____10____ we would be at a loss on the stage," he said. Yao came up with this method just to keep the team together.

C

Shanghai is the first city to carry out strict regulations(规章) on rubbish sorting and recycling on July 1, 019. Shanghai requires its residents(居民) to sort rubbish 1 four categories(类别), namely recyclable, 2, dry and wet waste. If people 3 to sort their rubbish properly, they can be fined up to 00 yuan.

Since the regulation took effect, the amount of total daily waste in Shanghai has been reduced by an average(平均) of 15,500 tons, dropping 6 percent from the end of 018, 4 the average daily weight of recyclables hits 4,500 tons, five times higher than the end of 018, according to the Shanghai Landscaping and City Appearance Administrative Bureau.

The city also 5 1,000 waste-sorting stations and more than 40,000 waste bins have been dated(更新). The city's waste collection and transportation system is complete, according to the bureau.

"Proper waste sorting protects the environment and saves natural resources," said Deng Jianping, director of the bureau. "Led by the central government, Shanghai is making efforts to develop long-term 6 to rubbish management."

However, there have also been some problems. Some people complained that it is difficult to 7 wet garbage, as they are asked to remove wet garbage from its bag when 8.

According to the sorting rules, the wet garbage must go in the wet waste bin and the bag must go in the dry-waste bin.

This separation is 9, as it ensures that the wet garbage will decompose(分解) properly and become useful organic(有机的) waste, the bureau said.

Plastic bags can affect this process. Some people in Shanghai are instead using paper bags that can

biodegrade(生物降解) or plastic containers(容器) that can be 30 and reused according to *Xinhua*.

D

When people want to know about the weather, they usually listen to the radios, watch TV, read newspapers, or surf the Internet. However, you can also find many weather 1 among wildlife, because of their highly developed senses.

A(n) 2 in air pressure (压力) produces an effect on small animals in many ways. Mice and deer are good weather predictors. People who spend a lot of time outdoors have found that, before a storm, field mice come out of their 3 and run around. Deer leave high ground and 4 from the mountains.

Birds are 5 good weather predictors because they also show the effect of a pressure drop in many ways. For example, some birds become irritable (易怒的) and will 6 for a piece of bread. Other birds sing just before a storm. Birds also find safe places before a storm. You will 7 see birds hiding in trees or getting together on a wire close to a building. The low pressure before a storm makes the air so thin that birds have difficulty 8.

It is 9 to see many birds flying overhead in the summertime, rather than during the periods in the spring or autumn. Watch for other weather signs if you see this. If they fly in the wrong direction, the birds may be flying before a storm.

By paying closer attention to some important signs in nature, we can better 10 any

kind of weather. Is that interesting?

| 10. A. pay for | B. wait for | C. prepare for | D. ask for |

E

Mr. Jackson was our science teacher. On the first day of class, he gave us a talk about an animal called wampus. He told us that the wampus lived on earth millions of years ago during the Ice Age and died out because of the change of climate (气候). We all listened carefully and took ___1___ of everything he said. Later we had a test.

When the exam paper was ___2___ to me, I was surprised and sad. There was a big red “×” through each of my answers. I failed. But how come? Anyway on the test paper, I had ___3___ what Mr. Jackson said in class.

Then I realized that no one passed the exam at all. What had happened?

“Very simple.” Mr. Jackson explained. “I had made up all that story about the wampus. There had never been any such animal, so the information in your notes was not correct. Do you expect to get ___4___ marks for incorrect answers?”

Hearing this, we felt it hard to understand so we were ___5___. What kind of test was this? What kind of teacher was he?

How could we believe he gave us so much information about an animal that had not been there at all? How was it possible for us students to ___6___ what the teacher taught us?

“The zeros on your papers will be ___7___ in your grade books,” he said. And he did it.

Through this experience, Mr. Jackson hoped that we would learn something. Teachers and

books are not always 8. In fact, no one is. He told us not to let our mind go to sleep. Instead, we should keep thinking all the time and speak up if we think there are 9 in our teachers' words or in books.

We should develop the habit of doubting, and the ability to decide by ourselves. What a special 10 he gave us! I will always remember it.

三、阅读理解

A

Five, four, three, two, one, blast off (发射升空)! At 00:23 on Oct 16, 2021, the Shenzhou XIII spacecraft rose into the sky from the Jiuquan Satellite Launch Center in Gansu. Three

Chinese astronauts—Zhai Zhigang, Wang Yaping and Ye Guangfu—set off for the Tiangong space station.

The spacecraft (宇宙飞船) successfully docked (对接) with the space station core module Tianhe. The crew (机组人员) will stay in space for six months, carrying out the longest-ever space mission by Chinese astronauts.

Shenzhou XIII is the fourth spacecraft to visit the Tiangong station and the second manned ship to transport astronauts to the orbiting outpost (轨道位置). Before it, Shenzhou XII manned spacecraft was launched on June 17, carrying three astronauts—Nie Haisheng, Liu Boming and Tang Hongbo. They stayed in the space station for three months and returned to Earth on Sept 17.

The Shenzhou XIII astronauts have a wide range of assignments (任务), such as doing medical experiments, setting up robotic (机械的) arms and checking the devices (设备) inside the station. They have performed (执行) two space walks to work outside the station—one was on Nov 7, with Wang becoming China's first female spacewalker, while the other was on Dec 26.

The mission is a valuable (有价值的) opportunity for China's science community (团体) because it allows the astronauts to carry out in-orbit experiments that take a lot of time and manual work, Pang Zhihao, a former analyst (分析师) at the China Academy of Space Technology, told *China Daily*.

The Shenzhou XIII mission has fueled (点燃) teenagers' passion for space exploration as well. On Dec 9, the astronauts gave a science lecture to millions of students on Earth. They showed the kids a glimpse (一瞥) of their space life and did some fun science experiments. For example, Wang made a water ball to show that water in space is different from that on Earth. It will not flow downward (向下) if you try to pour it into a cup.

Denis Simon, executive (执行的) director of the Center for Innovation Policy at Duke University in the US, told *Xinhua* that China's success in space continues to be impressive. "China is now well on its way to being a leader in space exploration," he said.

1. What do we know about the mission of Shenzhou XIII?
 - A. It has the most astronauts ever sent into space.
 - B. It is the first mission to send astronauts to an orbiting outpost.
 - C. The spacecraft is the first one to visit the Tiangong space station.
 - D. It is the longest-ever space mission by Chinese astronauts.
2. What is Paragraph 4 mainly about?
 - A. Devices astronauts used to finish their tasks.
 - B. Who spacewalkers are.
 - C. How the space walks were performed.
 - D. The tasks for Shenzhou XIII astronauts.
3. What do we know about water in space?
 - A. It does not flow downward.
 - B. Its color is different from water on Earth.
 - C. It flows quicker than it does on Earth.
 - D. It will break a cup if people try to pour it.
4. What does Denis Simon mean in the last paragraph?
 - A. There will be more success in space exploration around the world.
 - B. Cooperation between China and the US is going well.
 - C. China has followed the laws of space exploration.
 - D. China has done a great job in space exploration.

B

Can't find any place on Earth for your next holiday? Lucky for you, a Californian company is going to offer you a chance to take a vacation in space by building a hotel in orbit (轨道).

The Orbital Assembly Corporation plans to build Voyager Station, a space hotel that includes rooms for tourists, in 2026, and open it in 2027. It will be able to carry up to 400 people.

The space hotel will be shaped like a large wheel, with 24 space pods (around the outside of the 200-meter-wide structure (结构体)). Each pod is 24 meters long and 12 meters wide. The pods will be used for restaurants, bars, gyms, rooms for tourists, laboratories for research and so on.

The company says that some pods will even be private homes that people can buy.

"Finally, going to space will just be another choice for people's vacation, just like going on a cruise (巡洋舰), or going to Disney World, said Tim Alatorre, senior architect (建筑师) of the

space hotel. He said that the space hotel may even include a concert hall and a movie theater.

The company says that the space hotel will have gravity (重力) that is about one-sixth as strong as Earth's. The low gravity means people can do things like jump higher, lift heavier things and enjoy sports such as basketball in a new way.

5. Which is true about the space hotel?

- A. It has already been opened.
- B. It has 24 space pods and can carry up to 200 people.
- C. Each pod is 24 meters wide and 12 meters long.
- D. Its pods may even be owned by people as their private homes.

6. If a man weighs 60 kilograms on Earth, how heavy will he be in the space hotel?

- A. 5 kilograms.
- B. 10 kilograms.
- C. 100 kilograms.
- D. 360 kilograms.

7. Tim Alatorre thinks it will be _____ for common people to visit the space hotel.

- A. possible
- B. dangerous
- C. tiring
- D. Hopeless

C

The solar calendar divides the year into 24 solar terms (节气). Start of Spring (立春), the first solar term of the year, usually falls between Feb. 3 and Feb. 5 every year. This year, it fell on Feb. 4.

After Start of Spring, everything turns green and is full of energy. People clearly see that the daytime is becoming longer and the weather is becoming warmer.

Spring is the best season for kite-flying. As a traditional folk activity, it has a history of more than 2,000 years. It can help build people's health and prevent diseases.

In China, it is said that the egg can be set upright on the day of Start of Spring. It is believed that if someone can make the egg stand on the day of Start of Spring, he will have good luck in the future.

In many parts of China, people follow the custom of "biting the spring" on the day of Start of Spring. They eat spring pancakes, spring rolls (春卷), or a few mouthfuls of carrots.

The custom of posting calligraphy (书法) and paintings on people's doors in spring first appeared during the Tang Dynasty. People would do so to welcome spring and good luck on the day of Start of Spring.

People in China began holding a special ceremony on the day of Start of Spring about 3, 000 years ago. By the Qing Dynasty, greeting spring had become an important folk activity. In Beijing, government officials welcomed spring in the wild field near Dongzhimen (the east gate of Beijing).

8. This year, Start of Spring fell on _____.
A. February 3rd B. February 4th C. February 5th D. February 2th
9. _____ can help improve people's health according to the passage.
A. Flying kites B. Eating eggs C. Eating spring rolls D. Posting calligraphy
10. What does the underlined word "upright" in Paragraph 4 probably mean in Chinese?
A. 漂浮的 B. 直立的 C. 弯曲的 D. 变形的
11. Why do people post calligraphy and paintings on the door?
A. To decorate the house. B. To sweep away bad luck.
C. To prevent diseases. D. To welcome spring and good luck.
12. This passage mainly talks about the _____ of Start of Spring.
A. history B. legend (传说) C. customs D. food

D

Knowing that Mrs. Mallard suffered from a heart trouble, great care was taken to tell her as gently as possible the news of her husband's death.

It was her sister Josephine who told her, in broken sentences. Her husband's friend Richards was there, too. He had been in the newspaper office when news of the railroad disaster was received, with Brently Mallard's name leading the list of "killed". He had only taken the time to make sure of its truth by a second telegram, and hurried to send the sad message.

She did not hear the story as many women have heard the same. She wept at once, with wild abandonment (抛弃), in her sister's arms. When the storm of sadness had spent itself she went away to her room alone.

There stood, facing the open window, a comfortable armchair. Into this she sank, tired from a physical exhaustion that held her body and seemed to reach into her soul.

She could see in the open square before her house the tops of trees that were all aquiver (颤抖的, 兴奋的) with the new spring life. The delicious breath of rain was in the air. The notes of a

distant song which someone was singing reached her, and countless sparrows were twittering in the eaves (屋檐).

There was something coming to her and she was waiting for it, fearfully. What was it? It was too hard to name. But she felt it, coming out of the sky, reaching toward her through the sounds, the smells, the color that filled the air.

Now her chest rose and fell violently. She was beginning to recognize this thing that was approaching to possess her, and she was trying very hard to beat it back with her will. When she gave up trying, a little whispered word escaped her lips. She said it over and over under the breath: “free, free, free!”

She did not stop to ask if it was extreme joy that held her. She knew that she would weep again when she saw the kind, gentle hands folded in death; the face that had never looked at her except with love, gray and dead. But she saw beyond that bitter moment many years to come that would belong to her absolutely. And she opened and spread her arms out to them in welcome.

There would be no one to live for during those coming years; she would live for herself. There would be no powerful will against hers.

And yet she had loved him—sometimes. What did it matter! What could love count for in the face of her new freedom.

“Free! Body and soul free!” she kept whispering.

Josephine was kneeling before the closed door with her lips to the keyhole. “Louise, open the door! I beg; open the door—you will make yourself ill.”

“Go away. I am not making myself ill.”

Her fancy (幻想) was running wild along those days ahead of her, all sorts of days that would be her own. She breathed a quick prayer that life might be long. It was only yesterday she had thought with a shake that life might be long.

She stood up after a long time and opened the door to her sister’s begging. She carried herself unknowingly like a goddess of Victory. She held her sister’s waist, and together they walked down the stairs.

Someone was opening the front door with a key, It was Brently Mallard who entered, a little travel-stained (风尘仆仆的), calmly carrying his suitcase and umbrella. He had been far from the scene of the accident, and did not even know there had been one, He stood amazed at Josephine’s

sharp cry; at Richards' quick motion to screen him from the view of his wife.

When the doctors came, they said she had died of heart disease—of the joy that kills.

13. What does the underlined sentence in Paragraph 7 indicate?
- A. Mrs. Mallard decided to fight back when her husband beat her.
 - B. Mrs. Mallard was trying hard to fight against her heart trouble.
 - C. Mrs. Mallard was struggling with the guilty feeling of happiness.
 - D. Mrs. Mallard was extremely sad because of her husband's death.
14. What can we infer about Mr. Mallard?
- A. He was killed in a railroad disaster.
 - B. He survived the railroad accident.
 - C. He was unaware of what was going on.
 - D. He hurried back to comfort his wife.
15. What can we learn from Paragraph 14 "Her fancy.... might be long"?
- A. Mrs. Mallard was more afraid of her future life.
 - B. Mrs. Mallard missed her husband very much.
 - C. Mrs. Mallard always thought life was hopeful.
 - D. Mrs. Mallard used to think life was hopeless.
16. What really killed Mrs. Mallard?
- A. The joy of seeing her husband coming back alive.
 - B. The shock of losing her coming freedom.
 - C. The fear of seeing the ghost of her husband.
 - D. The sadness of losing her husband suddenly.

E

Once a teacher asked his two students to come and meet him at the start of a road which was near a forest.

The two students got there. The teacher showed them the road and said, "You both have to start here and reach the end point of the road. Completing this road will also influence the result of the test which will happen next week. After this race, I hope you are all ready for the test next week."

He wished them luck and started the race. The two students started together. Just after a while, they saw that the road was divided into two paths. The first student decided to follow the path which seemed clear and was easier to go through. The second student decided to go through the path which was blocked (阻挡) by a lot of fallen trees.

The first student finished first and felt clever about himself. He passed that road easily, because there were no obstacles on the path. The second student took a while to reach the end point as he had to pass through the obstacles on that path. The second student was happy that he was able to complete that race though he took the difficult path. When the second student reached the end point, the first student said proudly, "I am glad I chose the easier path of the two."

For the next test, the students were called near a ravine (沟壑). The teacher looked at them and said, "You have to jump to the other side of this ravine." The first student never did that before. He got scared and stepped back (后退). The second student remembered his road of the last test and how he jumped wide gaps (间隙) there. He jumped into the air and he made it!

After the test, the teacher said to the first student, "When you chose the easier path last week, it helped you to complete that test easily, but you were not able to prepare for harder tests."

17. What did the teacher ask his two students to do after they arrived at the start of a road?

- A. To guess the result of the test.
- B. To start the race and decide who was cleverer.
- C. To find where the road was divided into two paths.
- D. To walk through the forest and prepare for the next test.

18. The underlined word "obstacles" means _____ in Chinese.

- A. 苦难 B. 痛苦 C. 障碍 D. 偏差

19. Why did the first student step back from the ravine?

- A. Because he forgot his road of the last test.
- B. Because he didn't have the courage to jump.
- C. Because he might be ill and couldn't jump at all.
- D. Because he never saw the ravine like that before.

20. We can learn from the passage that _____.

- A. we should learn from others in life
- B. a good teacher is very important to us

- C. we should often go through the forest alone
- D. life is full of challenges and we shouldn't get scared

21. What's the best title for the passage?

- | | |
|-----------------------|---------------------------|
| A. A special test | B. Two clever students |
| C. The difficult path | D. An experienced teacher |
