题型四、自招面试题（适用于深外自招）

16. Recently, fitness becomes a hot topic. As we all know, avoiding alcohol, eating more fruits and vegetables and losing weight will be some good ideas of keeping fit. However, there are still a lot of people keep bad habits and get chronic diseases like diabetes and stroke. In your opinion, should doctors treat illnesses in people who have not looked after their health or kept good habits?
Imagine you are one of the doctor and you meet one patient. He doesn't follow your advice and after the treatment, he continues taking junk food and drinking a lot. What will you do and what will you say to him?

17. Environment is so important to us. And nowadays, global warming, climate change, deglaciation are all so urgent to the whole world. According to the latest news, the low-land islands in Pacific Ocean is going to be submerged, a large number of people will have to be relocated and culture heritages will all be down to the sea forever.
Obviously, if all of us can work together, we can solve the problem. However, The Climate Conference in Copenhagen every year, government cannot reach the agreement. So, in your opinion, why don't governments, corporations and individuals do more to help prevent global warming?

18. Nowadays, China government pays attention to our energy safety. And we are working on alternative energies like solar power, hydro power and wind energy. Apparently, we use more energy than years ago and our development relies on the energy we can get.

Now, you are the government of one small country, and the energy resources for this country is so limited that you should rely on energy from other countries. Please think about what advantages or disadvantages you have.

19. Alternative energies are good choices when we are facing the global warming. However, for solar power, the solar panels are very expensive for people to buy. And the wind turbine also cost a lot of money. For consumers like you and me, will you be willing to pay extra cost for alternative energy? And for government, what is more important when considering energy use: cost or impact on the environment?

20. Buildings bring us comfortable homes and a lot of specific functions like galleries, libraries, etc. Some people like functional architectures because they feel convenient. While some people care about the beauty of the architectures for the reason that buildings are one part of the society and environment.

So, in your opinion, do you agree that architects have a 'wide responsibility' to society, or should they just do what their client want?
