03-31 第2篇

# 阅读理解（议论文）

① "I am too tired." Many of my classmates often say these words. Many students today spend too much time sitting in the classroom or playing computer games at home. As a result, they often feel tired and sick. In fact, doing sports is very important for our health and mind.

② First, exercise can keep us fit. When we run, swim, or play basketball, our bodies will become stronger. A strong body helps us avoid getting ill easily. It is better than taking much medicine.

③ Second, doing sports is a good way to relax. After a long day of studying hard, the brain needs a rest. Sweating (出汗) on the sports field can make us feel happy and relaxed. It also helps us sleep better at night. A good sleep means enough energy for the next day.

④ Finally, we can make new friends through sports. When we play games in a team, we have to talk and work with others. Teamwork teaches us how to share and how to help each other. We are not just running after a ball; we are learning social skills.

⑤ In a word, exercise brings us many benefits. Let's put down our phones, close our computers, and spend at least one hour a day on sports.

**注释：** sweat 出汗；social skill 社交技能
