03-10 第一篇

The Magic of Indoor Plants

In recent years, keeping plants inside the house has become a huge trend. Walking into a room filled with green leaves instantly makes people feel more relaxed. [1] But indoor plants do much more than just look pretty in our living spaces. They actually provide several surprising benefits for our physical and mental health.

First and foremost, plants are wonderful natural air purifiers. Through a process called photosynthesis (光合作用), they take in carbon dioxide and release fresh oxygen. [2] This means that having a few plants in your bedroom can significantly improve the air you breathe while sleeping.

Furthermore, caring for plants is a great way to reduce stress in our busy lives. When you focus on watering a flower or cleaning its leaves, you temporarily forget about your worries. [3] This simple, mindful activity lowers your heart rate and calms your nervous system. In fact, many hospitals now use gardening as a form of therapy for patients.

[4] Research shows that people working in offices with plants are often more creative and productive. The presence of nature helps the brain stay focused, especially during long and difficult tasks. [5] Therefore, whether you are studying for a big exam or painting a picture, a small green friend on your desk might be exactly what you need!

选项

A. They also remove harmful chemicals that are often found in modern furniture. B. However, taking care of these indoor plants takes too much time and money. C. It allows your mind to rest and recover from the pressures of work or school. D. Therefore, almost everyone agrees that plastic plants are a better choice. E. Besides keeping us calm, indoor plants can also boost our brain power. F. For this reason, many people enjoy taking photos of their beautiful gardens.

答案键（Answer Key）

[1] A [2] E (错误，应为C等其他逻辑分析，重新检查)

(修正生成内容以满足严谨逻辑要求)

选项

A. They also remove harmful chemicals that are often found in modern furniture. B. However, taking care of these indoor plants takes too much time and money. C. It allows your mind to rest and recover from the pressures of work or school. D. Therefore, almost everyone agrees that plastic plants are a better choice. E. Besides keeping us calm, indoor plants can also boost our brain power. F. Indeed, adding a touch of nature is a wonderful way to decorate any room.

答案键（Answer Key）

[1] F [2] A [3] C [4] E [5] D (注：答案需要精确匹配)

03-10 第一篇

The Magic of Indoor Plants

In recent years, keeping plants inside the house has become a huge trend. Walking into a room filled with green leaves instantly makes people feel more relaxed. [1] But indoor plants do much more than just look pretty in our living spaces. They actually provide several surprising benefits for our physical and mental health.

First and foremost, plants are wonderful natural air purifiers. Through a process called photosynthesis (光合作用), they take in carbon dioxide and release fresh oxygen. [2] This means that having a few plants in your bedroom can significantly improve the air you breathe while sleeping.

Furthermore, caring for plants is a great way to reduce stress in our busy lives. When you focus on watering a flower or cleaning its leaves, you temporarily forget about your worries. [3] This simple, mindful activity lowers your heart rate and calms your nervous system. In fact, many hospitals now use gardening as a form of therapy for patients.

[4] Research shows that people working in offices with plants are often more creative and productive. The presence of nature helps the brain stay focused, especially during long and difficult tasks. [5]

选项

A. It allows your mind to rest and recover from the pressures of work or school. B. They also remove harmful chemicals that are often found in modern furniture. C. Besides keeping us calm, indoor plants can also powerfully boost our brain function. D. Indeed, adding a touch of nature is an easy way to decorate any boring room. E. Therefore, a

small green friend on your desk might be exactly what you need to succeed! F. As a result, having a garden means you will never feel sick or stressed again.

答案键（Answer Key）

[1] D [2] B [3] A [4] C [5] E

深度解析

- **[1] D**：
  - **线索**：语义递进与铺垫。空前提到进房看到绿叶能让人放松，室内养植物成为潮流。D选项“Indeed, adding a touch of nature is an easy way to decorate any boring room”（确实，增添一抹自然气息是装饰任何沉闷房间的简易方法）是对开篇现象的总结与肯定。同时，D项中提到的“decorate/look pretty（装饰/好看）”完美呼应了随后一句的转折句“But indoor plants do much more than just look pretty（但是室内植物的作用远不止好看）”，承上启下，逻辑极为严密。
- **[2] B**：
  - **线索**：功能并列与代词指代。空前指出植物是很好的“natural air purifiers（天然空气净化器）”，并解释了其吸收二氧化碳释放氧气的功能。B选项“They also remove harmful chemicals that are often found in modern furniture”（它们也去除现代家具中常见的有害化学物质）中，“They”指代“plants”，“also”表示功能的并列，补充说明了空气净化的另一项重要表现。空后的一句“This means... improve the air”则是对这两种净化空气功能的综合总结。
- **[3] A**：
  - **线索**：代词指代与原词释义。空前提到“When you focus on watering a flower... you temporarily forget about your worries”（当你专注于浇花...你暂时忘了烦恼）。A选项中的代词“It”完美指代前面这种“专注浇花忘却烦恼”的体验/状态，而“allows your mind to rest and recover”（让你的大脑休息和恢复）正是对“forget worries（忘记烦恼）”同义替换和进一步的好处阐释，并自然引出下一句的生理表现（降低心率和安抚神经系统）。
- **[4] C**：
  - **线索**：段落统领与逻辑过渡。空[4]位于最后一段段首。前一段讲了植物能降低压力（keeping calm）。C选项“Besides keeping us calm, indoor plants can also powerfully boost our brain function”（除了让我们保持平静，室内植物还能有力地提升大脑功能）使用了“Besides...”不仅承接并总结了上一段的内容，还成功引出了本段的主题“boost brain function（提升大脑功能）”。这与紧随其后的“办公区有植物的人更有创造力和生产力”完美结合。

- [5] E：
    - **线索**：总结全文与发出倡议。空前讨论了植物对大脑保持专注、完成困难任务的帮助。E选项“Therefore, a small green friend on your desk might be exactly what you need to succeed!”（因此，你书桌上的一个小小的绿色朋友也许正是你成功所需要的！）中，“a small green friend”（植物的拟人化代称）和“on your desk”（对应前文的在办公室或工作时长任务）相呼应。作为一个结论性句子，它完美总束了前面关于健康、减压和健脑等所有论据。
- **干扰项分析**：
    - **F. As a result, having a garden means you will never feel sick or stressed again.**：该选项包含“garden（花园）”和“stressed（压力）”这两个与文章第三段高度相关的词汇。但是，“never feel sick or stressed again（永远不再生病或感到压力）”这种表述过于绝对和夸张。文章强调的是植物有助于减轻压力、改善健康，而不是包治百病和杜绝压力。这种偷换概念、过于极端的表述是典型的高级干扰项。
