09–16 中考英语语法填空 练习二

主题：光伏发电 (Solar Power)

一、题目

阅读下面短文，在空白处填入一个适当的单词，或填入括号中所给单词的正确形式。

Solar power **1** (become) more popular in many cities today. It is clean, quiet, and easy to get in places with plenty of sunshine. Large panels **2** (place) on roofs **3** catch sunlight during the day. The energy **4** is produced can **5** (use) to run lights and machines. Some factories have decided to use clean power because it causes **6** pollution than coal. Scientists are working hard **7** (improve) the technology. **8** a sunny day, a single home may get enough electricity for daily life. We should protect nature **9** we still enjoy the gifts of the sun. In the near future, solar power **10** (play) a bigger role in our lives.

二、答案与解析

1. **答案：is becoming**
   - **考点**：动词时态。today 与“越来越受欢迎”表示现阶段正在发生的变化或趋势，用现在进行时 is becoming；若语境强调“已经变得更普遍”，也可用 has become，此处以 is becoming 为最贴切答案。
2. **答案：are placed**
   - **考点**：一般现在时的被动语态。panels 与 place 为被动关系（板被安装在屋顶），且陈述常态，主语为复数，故用 are placed。
3. **答案：to**
   - **考点**：非谓语动词（不定式表目的）。安装在屋顶的目的是接收阳光，用 to catch 表目的。
4. **答案：that / which**
   - **考点**：定语从句关系词。先行词 The energy，从句 __ is produced 缺少主语，指物，用 that 或 which。
5. **答案：be used**
   - **考点**：含情态动词的被动语态。energy 与 use 为被动关系，情态动词 can 后接动词原形，故为 be used。

6. **答案：less**
    - **考点**：形容词比较级。句中有 than coal，且 clean power 与 coal 对比污染更少，pollution 不可数，用 little 的比较级 less。
7. **答案：to improve**
    - **考点**：非谓语动词。work hard to do sth. 表示“努力去做某事”，用不定式 to improve。
8. **答案：On**
    - **考点**：介词。具体某一天前用 on，On a sunny day 在晴朗的一天。
9. **答案：while / when / as**
    - **考点**：从属连词。引导时间状语从句，表示“在……的同时/当……时”，我们应在享受太阳馈赠的同时保护自然，填 while、when 或 as 均可。
10. **答案：will play / is going to play**

- **考点**：一般将来时。In the near future 表示将来，谓语用 will play 或 is going to play。
