06-30 第1篇

阅读理解（应用文）

① **Summer Heat Safety Tips**

② When summer comes, the weather gets very hot. It is important to know how to stay safe and cool. Here are some useful tips to help you enjoy the summer without getting sick.

③ **Drink plenty of water.** In hot weather, your body loses water quickly through sweat (汗水). You should drink water often, even if you do not feel thirsty. Avoid sugary drinks like cola. Plain water is the best choice.

④ **Wear light-coloured and loose clothes.** Dark colours take in more heat. Light colours like white or light blue can help you feel cooler. Loose clothes let air move around your body. Always wear a hat or use an umbrella when you go out in the sun. Do not stay in the sun for too long, especially between 11 a.m. and 3 p.m. when the sun is strongest.

⑤ **Stay in a cool place.** If you feel dizzy (头晕) or weak, move to a shaded or air-conditioned place at once. Rest and drink some water. If you feel worse, tell an adult and ask for help. Summer is fun — let us stay safe and healthy together!

注释： sweat 汗水；dizzy 头晕
