① **Should Schools Reduce the Number of Exams?**

② In recent years, many students, parents and teachers have discussed a hot topic: should schools cut down the number of exams? Some argue that fewer exams would reduce stress (压力) and give students more time to learn. Others believe that regular exams are necessary to check progress. Let us think about both sides.

③ **Those who support reducing exams** say that students today face too much pressure. They have exams in almost every subject, and the results can make them worried or even anxious (焦虑的). Less testing might give students more time to understand and enjoy what they learn instead of just memorizing for tests. It could also help them develop other skills, such as teamwork and creativity (创造力), which are hard to measure in exams.

④ **Those who disagree** point out that exams serve important purposes. First, exams help teachers and students see what has been learned and what still needs work. Without regular tests, it is harder to know if students are making progress. Second, exams prepare students for future challenges (挑战)—for example, the high school entrance exam. Third, some students study better when they know a test is coming; exams can motivate (激励) them to review and consolidate (巩固) their knowledge.

⑤ **A balanced view:** There is no simple "yes" or "no" answer. The key may be finding the right balance. Perhaps schools could reduce some repetitive (重复的) small tests and keep important ones. They could also try different ways of assessment (评估), such as projects or presentations, instead of only written exams. In this way, students might feel less stressed while still having clear goals and useful feedback (反馈) on their learning.

注释： stress 压力；anxious 焦虑的；creativity 创造力；challenge 挑战；motivate 激励；consolidate 巩固；repetitive 重复的；assessment 评估；feedback 反馈

选择题

1. According to the passage, why do some people support reducing exams? A. Because students face too much pressure and exams make them worried; fewer tests could give more time to learn and develop other skills. B. Because exams are too expensive for schools. C. Because teachers do not like marking exam papers. D. Because exams are against the law.

2. What do those who disagree think exams can do? A. Exams can replace all homework. B. Exams help teachers and students see progress, prepare for future challenges, and motivate students to study. C. Exams are the only way to teach students. D. Exams make students too relaxed.

3. What does the writer suggest as a balanced solution? A. Cancel all exams forever. B. Have more exams than before. C. Let students decide whether to take exams or not. D. Reduce some repetitive small tests, keep important ones, and try different assessment methods like projects or presentations.

4. What can we infer from the passage? A. The writer believes that only one side of the argument is correct. B. All schools have already reduced exams. C. The writer thinks there is no single right answer and a balanced approach may work best. D. Exams have no value at all.

5. What is the main purpose of the passage? A. To tell readers that exams are bad. B. To persuade schools to keep all exams. C. To describe how to design exam questions. D. To present different opinions on whether to reduce exams and suggest a balanced approach.
