12-02 第一篇

Tree Planting: Growing a Greener Future

Trees are often called the lungs of the Earth because they absorb carbon dioxide and release oxygen. They provide shade, reduce soil erosion, and offer homes for wildlife. Yet forests around the world are shrinking due to logging, fires, and land clearing. Tree planting is one of the most direct ways for people to help restore nature and fight climate change. Every tree planted is a step toward a healthier planet. [1]

Planting a tree may seem simple, but doing it correctly matters. The right time to plant depends on the climate—spring and autumn are usually best. Choosing native species helps the trees survive and support local ecosystems. The hole should be deep enough for the roots, and the soil should be kept moist after planting. A little care in the beginning leads to a strong, long-lived tree. [2]

Schools, communities, and organizations often hold tree-planting events. These events bring people together and teach both children and adults about the importance of trees. Participants learn how to plant, what species suit their area, and why forests matter. [3]

The benefits of tree planting reach far beyond the immediate area. Trees cool cities in summer by providing shade and releasing water vapor. They absorb stormwater and reduce flooding. In rural areas, tree belts protect farmland from wind and help keep soil in place. [4]

Governments and NGOs have launched large-scale tree-planting programs. Some countries aim to plant billions of trees over the next decade. While big projects matter, individual action counts too—planting a tree in your yard, joining a local event, or supporting tree-planting charities. [5]

选项

A. Tree planting is a powerful and hopeful act that anyone can take to protect the environment and leave a positive legacy for future generations. B. With proper planning and care, each planted tree has a better chance to grow and contribute to the ecosystem for decades. C. Through these activities, tree planting becomes not only an environmental action but also a social and educational experience. D. In both cities and countryside, trees provide services that make our lives safer, healthier, and more sustainable. E. Whether through large programs or small personal efforts, every tree planted helps build a greener, more resilient world. F. For example, the Miyawaki method uses dense planting of native species to create mini-forests that grow quickly.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：空前介绍树的生态功能、森林缩减、植树为直接恢复自然与应对气候变化的行动、每棵树都是贡献，空后需总结植树的意义与可参与性。A的"powerful and hopeful act that anyone can take"与"most direct ways for people to help"呼应，"positive legacy for future generations"与前文对应。
- **[2] B**：
  - **线索**：空前列举正确植树要点——时节、选本地种、挖坑深度、保持湿润、初期照料，空后需总结正确方法的效果。B的"With proper planning and care"与前文对应，"better chance to grow and contribute to the ecosystem for decades"与前文"strong, long-lived tree"呼应。
- **[3] C**：
  - **线索**：空前说学校社区组织举办植树活动、凝聚人群、教授成人与儿童树的重要性、参与者学习种植与物种选择，空后需总结活动多层面意义。C的"Through these activities"指代前文，"not only an environmental action but also a social and educational experience"与前文呼应。
- **[4] D**：
  - **线索**：空前列举植树的广泛效益——城市遮荫降温、吸收雨水减洪、农村防风固土，空后需总结城乡双重服务。D的"In both cities and countryside"与前文对应，"safer, healthier, and more sustainable"概括多类效益。
- **[5] E**：
  - **线索**：空前说政府与NGO发起大规模植树、有的国家目标数十亿棵、个人行动同样重要——庭院植树、参加活动、捐赠，空后需总结各类行动的累积效应。E的"Whether through large programs or small personal efforts"与前文对应，"every tree planted helps build a greener, more resilient world"是合理收尾。
- **干扰项分析**：
  - **F. For example, the Miyawaki method...**：以For example开头，为具体植树方法案例。各空均为概括或过渡句；[2]易被误选因涉及方法，但该空需总结正确种植与照料的效果，而非补充某一技术的细节。
