12-22 第二篇

Air Quality: Breathing Cleaner Air

The air we breathe affects our health every day. In many cities around the world, air pollution has become a serious problem. Vehicle exhaust, factory emissions, and burning coal or wood release tiny particles and harmful gases into the air. When pollution levels are high, people may experience coughing, eye irritation, and difficulty breathing. Long-term exposure has been linked to heart disease, lung problems, and other health issues. [1]

Air quality is often measured by the Air Quality Index, or AQI. The index uses numbers and colors to show how clean or polluted the air is. Green usually means good, while orange, red, or purple indicate worsening conditions. Many weather apps and websites now display AQI so people can plan outdoor activities on cleaner days. On bad air days, health experts recommend staying indoors, closing windows, and avoiding heavy exercise outside. [2]

Improving air quality requires changes in how we produce energy and travel. Shifting from fossil fuels to renewable sources like solar and wind reduces emissions. Electric vehicles and better public transport can cut pollution from cars. Cities can plant more trees, which absorb carbon dioxide and filter pollutants. Some countries have set strict rules for factories and vehicles, and air quality has improved as a result. [3]

Individuals can also contribute. Using less energy at home, choosing walking or biking for short trips, and avoiding burning trash or leaves helps. Supporting policies that promote clean air and holding leaders accountable can drive bigger changes. Air quality is a shared resource—what one person or country does affects others nearby. [4]

Clean air is a right and a responsibility. By understanding the sources of pollution and taking action at every level, we can work toward a future where everyone can breathe easier. [5]

选项

A. Poor air quality has become a global health concern that demands attention from governments, industries, and citizens alike. B. These tools make it easier for people to take simple steps to reduce their exposure when the air is unsafe. C. With the right policies and habits, significant improvements in air quality are achievable. D. Protecting the air we share is a collective task that starts with individual actions and grows through community and policy efforts. E. Understanding air quality helps us protect our health and make informed choices about when and how we spend time outdoors. F. For

example, Beijing has seen improved air quality in recent years through stricter emission controls and a shift toward cleaner energy.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：空前说呼吸的空气每日影响健康、多地空气污染严重、车辆尾气工厂排放燃煤燃木释放颗粒与有害气体、高污染时咳嗽眼刺激呼吸困难、长期暴露与心脏病肺病等相关，空后需总结空气质量作为全球健康关切及多方关注需求。A的"Poor air quality has become a global health concern"与前文呼应，"demands attention from governments, industries, and citizens"与前文对应。
- **[2] B**：
  - **线索**：空前说空气质量常用AQI衡量、用数字颜色表示、绿好橙红紫恶化、天气应用和网站显示AQI便于规划户外、恶劣日专家建议室内关窗避免户外剧烈运动，空后需总结这些工具帮助人们减少暴露。B的"These tools"指代前文，"make it easier for people to take simple steps to reduce their exposure"与前文对应。
- **[3] C**：
  - **线索**：空前说改善需改变能源生产与出行、化石燃料转向太阳能风能、电动车与公交减少汽车污染、城市植树吸收二氧化碳过滤污染物、有的国家设严格规定空气质量已改善，空后需总结政策与习惯可实现显著改善。C的"With the right policies and habits"与前文对应，"significant improvements in air quality are achievable"与前文呼应。
- **[4] D**：
  - **线索**：空前说个人也可贡献、省家用能、短途步行骑车、避免焚烧垃圾落叶、支持清洁空气政策、空气质量是共享资源，空后需总结保护的集体性。D的"Protecting the air we share is a collective task"与前文呼应，"starts with individual actions and grows through community and policy efforts"与前文对应。
- **[5] E**：
  - **线索**：空前说清洁空气是权利与责任、通过理解污染源和在各级采取行动、可迈向人人呼吸更轻松的未来，空后需总结理解空气质量的价值。E的"Understanding air quality helps us protect our health and make informed choices"与前文对应。
- **干扰项分析**：

- **F. For example, Beijing has seen improved air quality...**：以For example开头，为具体城市案例。各空均为概括或过渡句；[3]易被误选因涉及改善，但该空需总结政策与习惯可实现改善，而非补充某城市的具体措施细节。
