04-09 第一篇

The Memory Palace Technique

Have you ever wished you could remember things more easily—like facts for a test or a long list of items? There is an ancient trick that can help. It is called the "memory palace" or "method of loci," and people have used it for over 2,000 years. [1] The idea is simple: you picture a place you know well, such as your home or school, and you "place" each item you want to remember in a different spot in that place. When you need to recall the information, you take a mental walk through the place and "pick up" each item along the way.

Why does it work? Our brains are very good at remembering locations and images. [2] For example, you might remember exactly where your favorite book sits on the shelf, even if you have not thought about it for months. The memory palace uses this natural strength by turning abstract information like numbers or words into vivid mental pictures. Studies show that people who use this method can remember two to three times more than those who simply read or repeat information.

How can you build your own memory palace? First, choose a familiar place. [3] Your bedroom, your daily route to school, or even a favorite park can work well. The key is that you must be able to walk through it in your mind step by step. Next, decide on a clear path—from the door to the window, for example—and pick specific spots along that path. These spots will become "stations" where you will store the things you want to remember.

Then, make your memories vivid and strange. [4] If you need to remember "apple" for a shopping list, imagine a giant red apple sitting on your sofa, not just the word written on a list. The weirder and more colorful the image, the easier it is to recall later. Some people even add sounds, smells, or emotions to their mental images to make them stick. Your brain tends to forget boring things but remembers things that stand out.

[5] Whether you are studying for exams, learning a new language, or simply trying to remember your daily tasks, the memory palace can be a powerful tool. With a little practice, you may find that your ability to remember grows faster than you ever expected. Give it a try the next time you have something important to keep in mind.

选项

A. In fact, ordinary places and objects often stay in our memory for a long time. B. In short, this ancient method can help almost anyone improve their memory in many situations. C. The more clearly you can imagine each location, the better your recall will be. D. It works by linking new information to a mental map of a familiar space. E. For

instance, you could use the living room, the kitchen, or the hallway. F. The trick is to turn each piece of information into a striking image that you place at one of those stations.

答案键（Answer Key）

[1] D [2] A [3] E [4] F [5] B

深度解析

- **[1] D**：
  - **线索**：概念解释与机制说明。空前介绍"memory palace"或"method of loci"并提及"people have used it for over 2,000 years"，空后具体描述"The idea is simple: you picture a place you know well...'place' each item...in a different spot"。D选项"It works by linking new information to a mental map of a familiar space"（它通过将新信息与熟悉空间的心理地图联系起来而发挥作用）概括了方法的核心机制，"linking new information"与空后"place each item you want to remember"对应，"mental map of a familiar space"与"picture a place you know well"呼应，自然引出具体操作步骤。
- **[2] A**：
  - **线索**：大脑优势与例证衔接。空前指出"Our brains are very good at remembering locations and images"，空后举例"For example, you might remember exactly where your favorite book sits on the shelf"。A选项"In fact, ordinary places and objects often stay in our memory for a long time"（事实上，普通的地点与物品常常能在我们记忆中留存很久）中"In fact"承接前文对大脑优势的论断，"ordinary places and objects"与空后"where your favorite book sits on the shelf"对应，"stay in our memory"与"remember exactly"呼应，衔接自然。
- **[3] E**：
  - **线索**：地点选择与具体举例。空前提出"First, choose a familiar place"，空后说明"Your bedroom, your daily route to school, or even a favorite park can work well"。E选项"For instance, you could use the living room, the kitchen, or the hallway"（例如，你可以使用客厅、厨房或走廊）中"For instance"引出例证，"living room, kitchen, hallway"与空后"bedroom...route...park"形成同类举例，均在提供"familiar place"的具体选项，逻辑顺畅。
- **[4] F**：
  - **线索**：图像化方法与具体展开。空前指出"make your memories vivid and strange"，空后举例"If you need to remember 'apple' for a shopping list, imagine a giant red apple sitting on your sofa"。F选项"The trick is to turn each piece of information into a striking image that you place at one of those

stations"（诀窍在于将每条信息转化为醒目的图像，并放置在那些站点之一）中"turn...into a striking image"与空后"imagine a giant red apple"完美对应，"place at one of those stations"与前文"stations where you will store"呼应，"striking"与"vivid and strange"衔接，逻辑紧密。

- **[5] B**：
  - **线索**：全文收束与升华。空[5]位于结尾段段首，空后列举"studying for exams, learning a new language, daily tasks"并总结"memory palace can be a powerful tool...ability to remember grows"。B选项"In short, this ancient method can help almost anyone improve their memory in many situations"（简言之，这一古老方法几乎能帮助任何人在多种情境下提升记忆）用"In short"总结全文，"almost anyone"与"many situations"与空后各类应用场景呼应，"improve their memory"与"powerful tool...ability to remember grows"形成升华，收束得当。
- **干扰项分析**：
  - **C. The more clearly you can imagine each location, the better your recall will be.**：强调想象地点清晰度与回忆效果的关系，与记忆宫殿主题相关，易被误填[1]或[3]。但空[1]需概括方法的核心机制（"how it works"），C侧重操作细节（"clearly imagine"），与空后"picture a place...place each item"的初次引入衔接不及D自然；空[3]空前为"choose a familiar place"，空后需给出具体地点示例，E的"living room, kitchen, hallway"直接举例，C的"imagine each location"偏抽象，与空后"Your bedroom...route...park"的举例风格不符。属"主题相关但功能错位"型干扰。
