04-20 第二篇

School Lunch Reform: Healthier Meals for Students

For many students, lunch is the main meal they eat during the school day. It gives them the energy they need to focus in class and stay active in the afternoon. [1] Yet for years, school lunches in many places were criticized for being too high in fat, salt, and sugar, and too low in fresh vegetables and fruit. Parents and health experts worried that such meals could lead to poor eating habits and even health problems later in life.

In recent years, some schools have decided to make a change. They have started working with local farmers to buy fresh produce, reduced junk food in the cafeteria, and added more whole grains and lean protein to the menu. [2] The goal is not only to feed students but also to teach them what healthy eating looks like. Many schools now offer cooking classes or garden projects where students can learn where food comes from and how to make simple, nutritious meals.

Do these changes actually make a difference? Early results suggest yes. Students at schools with healthier lunch programs often report feeling more energetic and less sleepy after eating. [3] Some research shows that better nutrition can even improve test scores, as a well-fed brain is better at learning and remembering. Of course, not every student likes every new dish at first—change takes time—but over time, many come to enjoy the fresher tastes and lighter meals.

However, reforming school lunches is not easy. Fresh ingredients often cost more than processed foods, and preparing meals from scratch takes more time and labor. [4] Schools with limited budgets may struggle to afford better ingredients, while others may lack enough kitchen space or staff to cook fresh meals daily. Despite these challenges, many schools have found creative solutions, such as partnering with community organizations or applying for government grants（拨款）to support their programs.

[5] From improving students' health to building better eating habits for life, school lunch reform is about more than just what is on the plate. When schools take lunch seriously, they send a clear message: good food matters, and so do the students who eat it.

选项

A. In short, school lunch reform is an investment in both students' bodies and their futures. B. Studies have found that students who eat breakfast at home tend to have better attendance in school. C. The key is to see school lunch as part of education—not just a break between classes. D. That is why schools need support from governments, parents, and the community to succeed. E. In other words, what students eat at lunch

can affect how well they learn for the rest of the day. F. Schools that have made the switch say the benefits are worth the extra effort.

答案键（Answer Key）

[1] C [2] F [3] E [4] D [5] A

深度解析

- **[1] C**：
  - **线索**：引出学校午餐的问题与改革动机。空前描述"lunch is the main meal...gives them energy...focus in class"，空后说明"Yet for years, school lunches...were criticized for being too high in fat, salt, and sugar...Parents and health experts worried"。C选项"The key is to see school lunch as part of education—not just a break between classes"（关键在于把学校午餐看作教育的一部分——而不仅是课间休息）承接"main meal...energy...focus"，强调午餐的教育意义，自然引出空后对现状的批评（正因重要才更需改革），衔接顺畅。
- **[2] F**：
  - **线索**：学校改革举措与成效过渡。空前列举"working with local farmers...reduced junk food...added more whole grains and lean protein"，空后说明"The goal is not only to feed students but also to teach them...cooking classes or garden projects"。F选项"Schools that have made the switch say the benefits are worth the extra effort"（已做出转变的学校表示，收益值得付出额外努力）中"made the switch"指代空前各项改革举措，"benefits are worth the extra effort"自然过渡到空后"goal...teach them...cooking classes"，说明改革带来的教育价值，衔接自然。
- **[3] E**：
  - **线索**：健康午餐对学习表现的影响。空前提出"Students at schools with healthier lunch programs often report feeling more energetic and less sleepy"，空后说明"Some research shows that better nutrition can even improve test scores...well-fed brain is better at learning"。E选项"In other words, what students eat at lunch can affect how well they learn for the rest of the day"（换言之，学生午餐吃什么会影响他们当天后续的学习效果）中"In other words"承接空前"more energetic...less sleepy"，"affect how well they learn"与空后"improve test scores...better at learning"完美对应，逻辑紧密。
- **[4] D**：
  - **线索**：改革面临的困难与需要的支持。空前描述"Fresh ingredients often cost more...preparing meals from scratch takes more time and labor...Schools with

limited budgets may struggle...lack enough kitchen space or staff"，空后说明"Despite these challenges, many schools have found creative solutions...partnering...applying for government grants"。D选项"That is why schools need support from governments, parents, and the community to succeed"（因此学校需要政府、家长和社区的支持才能成功）中"That is why"承接空前种种困难，"need support from governments, parents, and the community"与空后"partnering with community organizations...government grants"呼应，衔接精准。

- **[5] A**：
  - **线索**：全文收束与升华。空[5]位于结尾段段首，空后列举"improving students' health...building better eating habits for life"并总结"school lunch reform is about more than just what is on the plate...good food matters, and so do the students"。A选项"In short, school lunch reform is an investment in both students' bodies and their futures"（简言之，学校午餐改革是对学生身体和未来的投资）用"In short"总结全文，"investment in both students' bodies and their futures"与空后"improving health...eating habits for life...more than what is on the plate"形成呼应，收束得当。
- **干扰项分析**：
  - **B. Studies have found that students who eat breakfast at home tend to have better attendance in school.**：强调家庭早餐与出勤率的关系，易被误填[1]或[3]。但全文主题为"学校午餐改革"，B讨论的是"breakfast at home"与"attendance"，与"school lunch"场景错位；空[1]需承接午餐的重要性并引出对现状的批评，B的早餐话题无法自然过渡到空后"school lunches...were criticized"；空[3]讨论的是健康午餐与学习/考试成绩，B的"attendance"（出勤）与"test scores...learning"焦点不同。属"主题相关但场景与焦点错位"型干扰。
