05-18 第二篇

Sign Language and Deaf Culture: A World of Visual Communication

For many deaf people, sign language is not just a way to communicate—it is at the heart of their culture and identity. Sign language uses hand shapes, facial expressions, and body movements to express meaning, and it is as rich and complete as any spoken language. [1] In fact, there are many different sign languages around the world, such as American Sign Language (ASL), British Sign Language (BSL), and Chinese Sign Language (CSL). Each has its own grammar and vocabulary. That is why we cannot simply "translate" sign language word by word from one country to another; they are different languages.

How does sign language work? [2] Signs are made with the hands, but the face and body are also important. For example, raising your eyebrows can change a statement into a question. The speed and size of a sign can show whether something is big or small, fast or slow. In other words, sign language is a full visual language that uses space, movement, and expression to convey meaning. Learning it takes time and practice, but it opens the door to a whole community.

Why is sign language important for deaf people? [3] For those who cannot hear, sign language is often the most natural way to communicate. It allows them to express themselves fully, share ideas, tell stories, and build friendships. Many deaf people feel that being forced to use only lip-reading or written words is limiting. Sign language gives them access to education, work, and social life on equal terms. For this reason, recognising sign language as an official language helps protect the rights of deaf people.

Deaf culture is rich and proud. [4] Deaf communities have their own history, art, poetry, and humour. Deaf artists create works that celebrate sign language and deaf identity. Many deaf people do not see deafness as a disability to be "fixed" but as a difference to be respected. They value their community and the bonds they share. So understanding deaf culture means seeing deaf people not as people who "lack" something, but as people with a unique way of living and communicating.

[5] In short, sign language and deaf culture deserve our respect and support. Learning a few basic signs can help us communicate with deaf friends or classmates. Schools and public places can become more inclusive by offering sign language classes or hiring sign language interpreters（手语翻译）. By valuing sign language, we build a society where everyone can participate fully. Remember: communication is a human right, and sign language helps make that right real for millions of people.

选项

A. That is because sign language is a real language with its own rules and varieties. B. In other words, sign language uses the whole body to express meaning. C. That is why sign language is essential for deaf people's full participation in society. D. It is true that deaf people have a rich culture and strong sense of identity. E. In conclusion, we should respect and support sign language and deaf culture. F. For example, some hearing parents choose to learn sign language for their deaf children.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：总领手语的多样性与独立性。空前描述"For many deaf people, sign language is not just a way to communicate—it is at the heart of their culture and identity. Sign language uses hand shapes, facial expressions, and body movements to express meaning, and it is as rich and complete as any spoken language"，空后说明"In fact, there are many different sign languages around the world, such as ASL, BSL, and CSL...Each has its own grammar and vocabulary...we cannot simply 'translate' sign language word by word from one country to another; they are different languages"。A选项"That is because sign language is a real language with its own rules and varieties"（那是因为手语是一种具有自身规则和变体的真实语言）中"That is because"解释手语的完整性，"real language...own rules and varieties"与空后多种手语、各自语法词汇、不可逐词对译精准对应，衔接顺畅。
- **[2] B**：
  - **线索**：手语的视觉与肢体表达方式。空前设问"How does sign language work?"，空后详述"Signs are made with the hands, but the face and body are also important...raising your eyebrows can change a statement into a question...The speed and size of a sign can show whether something is big or small, fast or slow...sign language is a full visual language that uses space, movement, and expression to convey meaning...Learning it takes time and practice"。B选项"In other words, sign language uses the whole body to express meaning"（换言之，手语用整个身体来表达意义）中"In other words"概括空后内容，"whole body to express meaning"与空后face、body、eyebrows、speed、size、visual language完美呼应，衔接自然。
- **[3] C**：
  - **线索**：手语对聋人社会参与的重要性。空前设问"Why is sign language important for deaf people?"，空后说明"For those who cannot hear, sign language is

often the most natural way to communicate...It allows them to express themselves fully, share ideas, tell stories, and build friendships...Being forced to use only lip-reading or written words is limiting...Sign language gives them access to education, work, and social life on equal terms...recognising sign language as an official language helps protect the rights of deaf people"。C选项"That is why sign language is essential for deaf people's full participation in society"（因此手语对聋人充分参与社会至关重要）中"That is why"承接空前及空后结论，"essential...full participation in society"与空后education、work、social life、rights精准对应，逻辑紧密。

- **[4] D**：
  - **线索**：聋人文化的丰富性与认同感。空前提出"Deaf culture is rich and proud"，空后详述"Deaf communities have their own history, art, poetry, and humour...Deaf artists create works that celebrate sign language and deaf identity...Many deaf people do not see deafness as a disability to be 'fixed' but as a difference to be respected...They value their community and the bonds they share...understanding deaf culture means seeing deaf people not as people who 'lack' something, but as people with a unique way of living and communicating"。D选项"It is true that deaf people have a rich culture and strong sense of identity"（的确，聋人拥有丰富的文化和强烈的认同感）中"It is true that"加强衔接，"rich culture and strong sense of identity"与空后history、art、celebrate、do not see as disability完美呼应，衔接得当。
- **[5] E**：
  - **线索**：全文收束与尊重支持手语及聋人文化的呼吁。空[5]位于结尾段段首，空后总结"sign language and deaf culture deserve our respect and support...Learning a few basic signs can help us communicate with deaf friends or classmates...Schools and public places can become more inclusive...By valuing sign language, we build a society where everyone can participate fully...communication is a human right...sign language helps make that right real for millions of people"。E选项"In conclusion, we should respect and support sign language and deaf culture"（总之，我们应尊重并支持手语和聋人文化）用"In conclusion"总结全文，"respect and support"与空后deserve、learning signs、inclusive、valuing形成呼应，收束有力。
- **干扰项分析**：
  - **F. For example, some hearing parents choose to learn sign language for their deaf children.**：涉及健听父母为聋儿学手语，易被误填[3]或[5]。但F讨论的是家庭层面的具体行为，而空[3]聚焦手语对聋人社会参与的整体重要性，空[5]呼吁社会层面的尊重与支持；F属于个体举例，与空[3]的社会权利、空[5]的宏观呼吁论述层级不同。F属"主题相关但论述层级错位"型干扰。
