05-19 第一篇

First Aid: Simple Skills That Can Save Lives

Accidents can happen anywhere—at home, at school, or on the street. When someone gets hurt, the first few minutes are often the most important. Knowing basic first aid can help you stay calm and do the right thing until professional help arrives. [1] In fact, first aid is the immediate care we give to an injured or sick person before a doctor or ambulance arrives. It does not replace medical treatment, but it can prevent a situation from getting worse and may even save a life. That is why learning first aid should be part of everyone's education.

What are the most important first aid skills? [2] One of the key skills is CPR—cardiopulmonary resuscitation（心肺复苏）—which can help restart a person's heart and breathing when they have stopped. Another essential skill is stopping serious bleeding by pressing firmly on the wound with a clean cloth. For burns, we should cool the area with running water for several minutes. For choking, we can use the Heimlich manoeuvre（海姆立克急救法）to help push the object out. In other words, knowing a few basic steps can make a big difference in an emergency.

Staying calm is also crucial. [3] When we panic, we may forget what to do or make wrong decisions. Take a deep breath, check if the scene is safe, and then call for help if needed. In China, the emergency number is 120. Tell the operator clearly where you are and what has happened. While waiting, follow the first aid steps you have learned. For this reason, practising first aid in classes or workshops helps us feel more confident when a real emergency happens.

Never do more than you are trained to do. [4] First aid is about keeping the person stable, not trying to "fix" them. Do not move someone who may have a broken bone or neck injury, as moving them could cause more harm. Do not give food or water to someone who is unconscious. If you are not sure what to do, it is better to stay with the person, keep them calm, and wait for professional help. So knowing our limits is as important as knowing what we can do.

[5] In short, first aid is a life skill that everyone can learn. You do not need to be a doctor to help in an emergency. By taking a first aid course and practising the steps, you can be ready to act when someone needs you. Remember: in those first few minutes, you might be the only one who can help. The skills you learn today could save a life tomorrow.

选项

A. That is because first aid is the first step we take before professional help comes. B. In other words, a few simple skills can help us respond correctly in emergencies. C. That is why keeping calm and calling for help are part of good first aid. D. It is true that we should only do what we are trained to do and avoid causing harm. E. In conclusion, everyone can learn first aid and be ready to help when needed. F. For example, some schools now have automated external defibrillators (AEDs).

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：总领急救的定义与作用。空前描述"Accidents can happen anywhere...When someone gets hurt, the first few minutes are often the most important. Knowing basic first aid can help you stay calm and do the right thing until professional help arrives"，空后说明"In fact, first aid is the immediate care we give to an injured or sick person before a doctor or ambulance arrives...It does not replace medical treatment, but it can prevent a situation from getting worse and may even save a life...learning first aid should be part of everyone's education"。A选项"That is because first aid is the first step we take before professional help comes"（那是因为急救是在专业救助到来前我们采取的第一步）中"That is because"解释急救的性质，"first step...before professional help comes"与空后"immediate care...before a doctor or ambulance arrives"精准对应，衔接顺畅。
- **[2] B**：
  - **线索**：核心急救技能概览。空前设问"What are the most important first aid skills?"，空后列举"One of the key skills is CPR...Another essential skill is stopping serious bleeding...For burns, we should cool the area with running water...For choking, we can use the Heimlich manoeuvre...knowing a few basic steps can make a big difference in an emergency"。B选项"In other words, a few simple skills can help us respond correctly in emergencies"（换言之，几种简单技能能帮助我们在紧急情况下正确应对）中"In other words"概括空后内容，"few simple skills...respond correctly in emergencies"与空后CPR、止血、灼伤、窒息处理及"make a big difference"完美呼应，衔接自然。
- **[3] C**：
  - **线索**：保持冷静与呼救的重要性。空前提出"Staying calm is also crucial"，空后详述"When we panic, we may forget what to do or make wrong decisions...Take a deep breath, check if the scene is safe, and then call for help if needed...In

China, the emergency number is 120...Tell the operator clearly where you are and what has happened...While waiting, follow the first aid steps...practising first aid in classes or workshops helps us feel more confident when a real emergency happens"。C选项"That is why keeping calm and calling for help are part of good first aid"（因此保持冷静并呼救是良好急救的一部分）中"That is why"承接空前及空后结论，"keeping calm and calling for help"与空后panic、deep breath、call 120、tell operator精准对应，逻辑紧密。

- **[4] D**：
  - **线索**：急救中的边界与限制。空前提出"Never do more than you are trained to do"，空后详述"First aid is about keeping the person stable, not trying to 'fix' them...Do not move someone who may have a broken bone or neck injury...Do not give food or water to someone who is unconscious...If you are not sure what to do, it is better to stay with the person, keep them calm, and wait for professional help...knowing our limits is as important as knowing what we can do"。D选项"It is true that we should only do what we are trained to do and avoid causing harm"（的确，我们只应做自己受过训练的事并避免造成伤害）中"It is true that"加强衔接，"only do what we are trained to do and avoid causing harm"与空后不移动、不喂食、不确定时等待完美呼应，衔接得当。
- **[5] E**：
  - **线索**：全文收束与人人可学急救的呼吁。空[5]位于结尾段段首，空后总结"first aid is a life skill that everyone can learn...You do not need to be a doctor to help in an emergency...By taking a first aid course and practising the steps, you can be ready to act when someone needs you...in those first few minutes, you might be the only one who can help...The skills you learn today could save a life tomorrow"。E选项"In conclusion, everyone can learn first aid and be ready to help when needed"（总之，人人都能学习急救并在需要时准备好帮助他人）用"In conclusion"总结全文，"everyone can learn...be ready to help when needed"与空后life skill、first aid course、be ready to act形成呼应，收束有力。
- **干扰项分析**：
  - **F. For example, some schools now have automated external defibrillators (AEDs).**：涉及学校配备AED除颤仪，易被误填[2]或[5]。但F讨论的是设备配置，而空[2]列举的是个人可操作的技能（CPR、止血、灼伤、窒息），空[5]强调人人可学的技能；F属于硬件设施，与空[2]的急救技能、空[5]的个人学习论述维度不同。F属"主题相关但论述对象错位"型干扰。
