06-27 第二篇

Schools Around the World

Education is a right for children everywhere, but schools are not the same in every country. Climate, culture, economy, and history shape how students learn and where they study. [1] In other words, schools around the world share the goal of teaching young people, but the way they do it can be very different. From one-room village schools to huge city campuses, from outdoor lessons to high-tech classrooms—the variety is surprising. Let us take a look at how education looks in different parts of the world.

In some regions, schools must adapt to the environment. [2] In very hot or cold places, school hours may be adjusted—starting early in the morning or closing during the worst weather. In rural areas, students might walk long distances or take a bus to reach school; some even study in boats or tents. In countries with many languages, lessons may be taught in the local language first, then in a national or international language. Nature and geography often decide when, where, and how children go to school. Flexibility helps schools serve their communities.

The school year and subjects vary widely. [3] In many Western countries, the school year runs from September to June, with a long summer break. In other places, such as Japan and Australia, the year may start in April or January. Subjects also differ: some schools focus heavily on exams, while others emphasise art, sport, or hands-on projects. In Finland, for example, students have short days and little homework, yet they often rank highly in international tests. There is no single "best" system—each country designs education to fit its own needs and values.

Technology is changing schools everywhere. [4] In wealthy countries, many classrooms have computers, tablets, and interactive whiteboards. Students may learn online or use apps for homework. In poorer areas, books and teachers may be scarce, and some schools use radio or mobile phones to reach students in remote villages. The gap between high-tech and low-resource schools is still large, but projects like low-cost tablets and free online courses are helping more children access learning. Technology can widen opportunities—or deepen inequality—depending on how it is used.

[5] Schools around the world may look different, but they all aim to prepare young people for the future. Understanding how others learn can help us appreciate our own education and imagine new possibilities. Whether you study in a tall building or under a tree, the desire to learn connects us all. The next time you sit in class, remember: somewhere else, a student is doing the same—in their own way.

选项

A. In other words, schools around the world share the goal of teaching young people, but the way they do it can be very different. B. Environment shapes school life—adjusted hours, long journeys, boats or tents, and local languages are common where conditions are challenging. C. The school year and subjects differ by country—some focus on exams, others on creativity; there is no single "best" system. D. Technology varies widely—from high-tech classrooms to radio lessons—and can either widen opportunities or deepen inequality. E. Despite their differences, schools everywhere aim to prepare young people and connect us through the shared desire to learn. F. For example, some countries give students a free lunch at school every day.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：空前描述"Education right everywhere...schools not same in every country...Climate, culture, economy, history shape how students learn, where study"，空后说明"From one-room village schools to huge city campuses...outdoor lessons to high-tech classrooms...variety surprising...take a look at different parts of world"。A选项"In other words, schools around the world share the goal of teaching young people, but the way they do it can be very different"（换言之，世界各地的学校都以教育年轻人为目标，但实现方式可能大不相同）中"In other words"概括空前，"share goal...way very different"与空后"one-room to huge...outdoor to high-tech...variety"精准呼应，衔接顺畅。
- **[2] B**：
  - **线索**：空前提出"In some regions, schools must adapt to the environment"，空后详述"Very hot or cold—school hours adjusted...early morning or close during worst weather...Rural—walk long distances, bus...some study in boats, tents...Many languages—lessons in local language first, then national/international...Nature, geography decide when, where, how...Flexibility helps serve communities"。B选项"Environment shapes school life—adjusted hours, long journeys, boats or tents, and local languages are common where conditions are challenging"（环境塑造学校生活——在条件艰难的地方，调整作息、长途跋涉、船校或帐篷学校、本地语教学都很常见）中"adjusted hours...long journeys...boats or tents...local languages...challenging"与空后内容完美对应，逻辑紧密。
- **[3] C**：

- **线索**：空前提出"The school year and subjects vary widely"，空后列举"Western countries—September to June, long summer...Japan, Australia—April or January...Subjects differ—some focus exams, others art, sport, hands-on...Finland—short days, little homework, rank highly...No single best system...each country designs to fit needs, values"。C选项"The school year and subjects differ by country—some focus on exams, others on creativity; there is no single 'best' system"（学年和科目因国而异——有的重视考试，有的重视创意；没有单一的"最佳"制度）中"year...subjects differ...focus exams...creativity...no single best"与空后内容精准对应，衔接自然。

- **[4] D**：
  - **线索**：空前提出"Technology is changing schools everywhere"，空后描述"Wealthy—computers, tablets, whiteboards...online learning, apps...Poorer—books, teachers scarce...radio, mobile for remote villages...Gap between high-tech and low-resource large...low-cost tablets, free online courses helping...Technology widen opportunities—or deepen inequality—depending on use"。D选项"Technology varies widely—from high-tech classrooms to radio lessons—and can either widen opportunities or deepen inequality"（技术差异巨大——从高科技课堂到广播课——既能扩大机会也能加深不平等）中"varies...high-tech...radio...widen opportunities...deepen inequality"与空后表述完美对应，衔接得当。

- **[5] E**：
  - **线索**：空[5]位于结尾段段首，空后为"Schools around the world may look different, but they all aim to prepare young people for the future. Understanding how others learn can help us appreciate our own education and imagine new possibilities. Whether you study in a tall building or under a tree, the desire to learn connects us all. The next time you sit in class, remember: somewhere else, a student is doing the same—in their own way."。E选项"Despite their differences, schools everywhere aim to prepare young people and connect us through the shared desire to learn"（尽管各地学校各异，它们都旨在培养年轻人，并通过共同的求知欲将我们联系在一起）用"despite differences...prepare young people...shared desire to learn"总结主题，与空后"look different...aim to prepare...desire to learn connects us all"形成呼应，收束精准。

- **干扰项分析**：
  - **F. For example, some countries give students a free lunch at school every day.**：涉及学校免费午餐，易被误填[3]或[4]。但F以"For example"引出饮食福利，而空[3]讨论学年与科目差异（考试vs创意、芬兰模式等），F的"free lunch"属于后勤支持，与"school year...subjects...exams...creativity"的课程制度焦点不同；空[4]讨论技术差异，F与科技无关。F属"主题相关但论述层次错位"型干扰。
