中考英语完形填空：科技体验

完形填空原文

Last month, our school set up a new science lab with computers and 3D printers. I had never *1* such technology before, and I was very excited when our teacher told us we could try it. On the first day, we learned how to design simple objects on the computer. At first, I thought it would be too *2* for me, but the teacher explained everything step by step. Soon I was able to create a small key holder on the screen.

The next step was to *3* our designs into real objects. When the 3D printer started working, I watched in amazement. Layer by layer, my key holder took shape. It took about twenty minutes to *4*. When I held the finished product in my hand, I felt a strong sense of achievement. I had made something real from just an idea!

That experience *5* me a lot. I realized that technology is not something far away or difficult — it is a tool that can help us turn our ideas into reality. Now I spend some of my free time learning more about coding and design. I hope to *6* my own useful inventions one day. Maybe I can create something that helps people in their daily *7*. The science lab has opened a new *8* for me, and I am grateful to our school for giving us such a wonderful *9*. I believe that with curiosity and hard work, anyone can learn to use technology and make a *10* to the world.
