中考英语完形填空：和家人逛公园

完形填空原文

Today was the first day of the National Day holiday. The weather was perfect — sunny and cool. My parents decided to take our whole family to the city park for a ***1*** day out.

We arrived at the park around nine o'clock. There were already many people there. Families with children, old couples walking hand in hand, and groups of young people taking photos everywhere. The park was ***2*** with laughter and music.

We first walked along the lake. The water was clear and I could see small fish swimming in it. My little sister was so ***3*** that she wanted to jump in and catch them. My mother quickly held her hand and told her to just watch.

Then we found a nice spot under a big tree and spread out a blanket for a picnic. My father had prepared sandwiches, fruit, and juice. We sat together, eating and ***4***. My grandmother told us funny stories about her childhood. We all laughed so hard that our stomachs hurt.

After lunch, my father suggested we rent a small boat on the lake. I was a little ***5*** at first because I couldn't swim. But my father promised to keep me safe. Once we were on the water, I felt calm and relaxed. The gentle breeze blew across my ***6***, and I could see the colorful autumn leaves on both sides of the lake. It was so beautiful.

In the afternoon, we visited the flower garden. There were roses, sunflowers, and many other kinds of flowers. My sister picked up some fallen ***7*** and made a small crown for my grandmother. Grandma wore it on her head and smiled happily. That was the sweetest moment of the day.

Before we left, we took a family photo in front of the park gate. Everyone was smiling. Looking at the photo later, I realized how ***8*** it was to spend time with family.

On the way home, my sister fell ***9*** in the car. She must have been very tired after a whole day of fun. I looked out of the window at the sunset and felt thankful for such a wonderful day.

The National Day holiday had just begun, but I already had a beautiful ***10*** to treasure.
