11-07 第2篇

中考英语完形填空：学做手工肥皂

完形填空原文

Last weekend, my mother and I attended a handmade soap workshop at the community center. I had always been curious about how soap was ***1***, so I was very happy to join this activity.

The instructor was a friendly lady who had been making soap for over ten years. She first introduced the basic ***2***: soap base, essential oils, dried flower petals, and silicone molds. She said that natural handmade soap is much better for our skin than factory-made ones.

We started by cutting the soap base into small ***3***. Then we put them into a glass bowl and heated it in a microwave for about one minute. The soap base slowly melted into a clear liquid. The instructor reminded us to be ***4*** because the liquid was very hot.

Next, we added a few drops of lavender essential oil. A lovely ***5*** immediately filled the room. Then we added some purple dried flower petals. The instructor said we could also add food coloring if we wanted our soap to be a special ***6***.

After mixing everything well, we poured the liquid into the molds. I chose a star-shaped mold and a heart-shaped one. We had to wait about thirty minutes for the soap to become ***7***.

When I took my soaps out of the molds, they looked like little works of art. The star-shaped one was my ***8*** because it had tiny flower petals inside that looked beautiful.

I brought the soaps home and put one in the bathroom. When I washed my hands with it, my skin felt very ***9***. I gave the heart-shaped one to my grandmother as a gift. She loved it and said it was the most ***10*** gift she had ever received.

选项

1. A. sold B. made C. used D. broken
2. A. rules B. problems C. ingredients D. machines
3. A. pieces B. lines C. circles D. holes
4. A. quick B. quiet C. careful D. brave
