中考英语完形填空：参加学校科技节机器人展示

完形填空原文

Our school held a Science and Technology Festival last week. My classmates and I had been working on a robot project for two months, and we were finally going to ***1*** it at the festival.

We built a small robot that could follow a black line on the ground. It had sensors to detect the line and wheels to move. At first, our robot kept going ***2*** the line. We spent many afternoons debugging the program and adjusting the sensors. Finally, it worked!

On the day of the festival, we set up our display table in the gym. Many students and teachers came to watch. Some younger students looked at our robot with ***3*** eyes. They asked lots of questions, and we tried our best to explain how it worked.

When it was our turn to demonstrate, I felt a little nervous. I placed the robot on the track and ***4*** the start button. The robot moved forward smoothly, following the black line. It made a turn and continued without any problem. The audience cheered! I was so ***5*** that our hard work had paid off.

After the demo, several teachers came to congratulate us. One teacher said our project showed good teamwork and creativity. She ***6*** us to keep exploring and maybe try a more challenging project next year.

We also visited other displays. There were drones, 3D printers, and even a robot that could solve a Rubik's cube. I was ***7*** by how much talent our school had. The festival made me realize that science is not just in textbooks—it's all around us, and anyone can ***8*** in it with curiosity and effort.

I'm already looking forward to next year's festival. Maybe we can build a robot that can pick up objects or ***9*** with voice commands. The possibilities are endless! For now, I will keep learning and practicing. Who knows? One day I might become an engineer and create robots that can help people in ***10*** life.
