04-16 第2篇

阅读理解（议论文）

① Today, almost every teenager plays video games. Some parents think video games are terrible. They believe games are a waste of time and make children lazy or violent (暴力的). However, is playing video games completely bad? I don't think so. In fact, video games can be good for us in several ways.

② First, video games can help improve our problem-solving skills (解决问题的能力). Many games are like difficult puzzles. Players have to think fast, make plans, and try different ways to pass a level (关卡). This helps the brain work faster. A study showed that teenagers who play strategy (策略) games often do better in logic and math tests.

③ Second, playing games can build teamwork and communication skills. Many modern games are played online with others. To win a game, players must talk to their teammates, share information, and help each other. They learn how to work with people they have never met before.

④ Finally, games are a great way to relax and reduce stress (缓解压力). After a long day of school and heavy homework, a short game can give the mind a break. Laughing and having fun in a game makes us feel happy and refreshed.

⑤ Of course, spending too much time on games is definitely bad for our eyes and studies. We should manage our time well and not let games control our lives. But we should also stop treating all video games like monsters. If played properly, they are a useful and fun tool.

注释： violent 暴力的；strategy 策略；reduce 减少，缓解

【定位】 第④段第2句 "After a long day of school and heavy homework, a short game can give the mind a break."

【解析】 对作者而言，一段短暂的游戏能让紧绷辛劳一天（上学、写重负作业）的大脑得到休息放松（give the mind a break）。忘掉全部作业是不可能的负面推断（B错）；文中也没强调父母参与（C错）；D不用眼更是荒谬（原文后文紧接着还承认了看屏幕太多对眼不利）。故选A。

5. 【答案】C

【题型】 细节理解 / 写作态度

【定位】 第⑤段第2–3句 "We should manage our time well and not let games control our lives. But we should also stop treating all video games like monsters."
