阅读理解（应用文）

① **City Public Bike & Shared Bike Use Guide**

② In many cities, you can now find public bikes and shared bikes on almost every street corner. They are a green way to travel short distances. Using bikes instead of cars helps reduce air pollution (污染) and keeps our city clean. Before you ride, here are some useful tips.

③ **How to use:** First, download the official app on your phone. Then scan (扫描) the QR code on the bike with your phone. The lock will open and you can start your ride. Remember to park the bike in a proper place when you finish — do not leave it in the middle of the sidewalk or block the way for others.

④ **Fees:** The first 30 minutes are usually free. After that, you pay about 1 yuan for every 15 minutes. If you return the bike to a parking area (停车区), you may get extra free time. Always check the app for the latest rules.

⑤ **Safety:** Wear a helmet if possible. Follow traffic rules and ride in the bike lane. Do not ride with two people on one bike. Children under 12 should not use shared bikes alone. Keep your hands on the handlebars and never use your phone while riding.

注释： scan 扫描；helmet 头盔；handlebar 车把手
