05-31 第二篇

Traditional Chinese Medicine Basics: An Introduction

Traditional Chinese Medicine, or TCM, has been used in China for thousands of years. It includes herbal medicine（中药）, acupuncture（针灸）, massage, and exercises like Tai Chi. TCM sees the body differently from Western medicine—it focuses on balance and the flow of energy, or "qi"（气）. [1] That is because TCM aims to prevent illness and treat the whole person, not just a single symptom. Instead of targeting one part of the body, TCM doctors look at how all parts work together. They may suggest changes in diet, lifestyle, and herbs to restore balance. Many people use TCM along with Western medicine. In short, TCM offers a different way to understand health. It has influenced medicine and wellness around the world.

What are Chinese herbs? [2] In other words, they are plants, roots, and minerals used to treat or prevent illness. Common herbs include ginseng（人参）for energy, chrysanthemum（菊花）for cooling, and goji berries（枸杞）for the eyes. Herbs are often combined in formulas—several ingredients work together for a specific purpose. Some herbs are boiled in water to make a tea-like drink; others are made into pills or powders. TCM doctors choose herbs based on each person's condition. What works for one person may not work for another. Herbs have been used for centuries, and modern research is studying how they work. Many herbs are now used in health products worldwide.

What is acupuncture? [3] That is why it uses thin needles to stimulate points on the body. According to TCM, the body has pathways called meridians（经络）through which qi flows. When qi is blocked, pain or illness may occur. Acupuncture aims to unblock these pathways by inserting needles at specific points. The needles are very thin, and many people feel little or no pain. Acupuncture is often used for pain, headaches, stress, and nausea（恶心）. Scientists are still learning how it works, but many studies suggest it can help with certain conditions. For this reason, acupuncture is now offered in some hospitals and clinics in the West. It has become one of the most well-known TCM practices globally.

How does TCM view diet? [4] It is true that food is seen as medicine in TCM. Different foods have different natures—some are "warming," others are "cooling." TCM doctors may suggest certain foods to balance the body. For example, ginger（姜）is often used to warm the stomach; mung beans（绿豆）may be suggested to cool the body in summer. Eating according to the seasons and one's condition is an important TCM idea. There is a saying: "Food and medicine share the same origin." This means that what we eat can support our health as much as medicine. A balanced diet is a key part of TCM wellness.

[5] It has a long history and is still used by millions of people today. Whether you use herbs, acupuncture, or dietary advice, TCM can complement modern medicine. So the next time you hear about TCM, remember: it is not a replacement for Western medicine, but another way to support your health. Let us appreciate the wisdom of ancient practices while embracing the best of modern science.

选项

A. That is because TCM aims to prevent illness and treat the whole person, not just a single symptom. B. In other words, they are plants, roots, and minerals used to treat or prevent illness. C. That is why it uses thin needles to stimulate points on the body. D. It is true that food is seen as medicine in TCM. E. In conclusion, TCM offers a holistic approach to health. F. For example, some people use TCM when they have a cold or flu.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：总领中医药的核心理念——防病与整体观。空前描述"Traditional Chinese Medicine, or TCM, has been used in China for thousands of years...TCM sees the body differently from Western medicine—it focuses on balance and the flow of energy, or 'qi'"，空后说明"Instead of targeting one part of the body, TCM doctors look at how all parts work together...They may suggest changes in diet, lifestyle, and herbs to restore balance...TCM offers a different way to understand health"。A选项"That is because TCM aims to prevent illness and treat the whole person, not just a single symptom"（那是因为中医药旨在预防疾病并治疗整个人，而非单一症状）中"That is because"解释TCM理念，"prevent illness and treat the whole person"与空后restore balance、look at how all parts work together精准对应，衔接顺畅。
- **[2] B**：
  - **线索**：中药的定义与组成。空前设问"What are Chinese herbs?"，空后列举"Common herbs include ginseng for energy, chrysanthemum for cooling, and goji berries for the eyes...Herbs are often combined in formulas...Some herbs are boiled in water to make a tea-like drink; others are made into pills or powders...Herbs have been used for centuries"。B选项"In other words, they are plants, roots, and minerals used to treat or prevent illness"（换言之，它们是用于治疗或预防疾病的植物、根茎和矿物）中"In other words"概括空后定

义，"plants, roots, and minerals"与空后ginseng、chrysanthemum、goji berries完美呼应，衔接自然。

- **[3] C**：
  - **线索**：针灸的原理——用细针刺激穴位。空前设问"What is acupuncture?"，空后详述"According to TCM, the body has pathways called meridians through which qi flows...Acupuncture aims to unblock these pathways by inserting needles at specific points. The needles are very thin...Acupuncture is often used for pain, headaches, stress, and nausea...acupuncture is now offered in some hospitals and clinics in the West"。C选项"That is why it uses thin needles to stimulate points on the body"（因此它用细针刺激身体穴位）中"That is why"承接空前及空后内容，"thin needles to stimulate points"与空后inserting needles at specific points、needles are very thin精准对应，逻辑紧密。
- **[4] D**：
  - **线索**：中医药对饮食的看法——食药同源。空前设问"How does TCM view diet?"，空后说明"Different foods have different natures—some are 'warming,' others are 'cooling'...TCM doctors may suggest certain foods to balance the body...ginger is often used to warm the stomach; mung beans may be suggested to cool the body...'Food and medicine share the same origin.'...A balanced diet is a key part of TCM wellness"。D选项"It is true that food is seen as medicine in TCM"（的确，在中医药中食物被视为药物）中"It is true that"引出饮食观，"food is seen as medicine"与空后Food and medicine share the same origin、different natures完美呼应，衔接得当。
- **[5] E**：
  - **线索**：全文收束与中医药的整体观。空[5]位于结尾段段首，空后总结"It has a long history and is still used by millions of people today...TCM can complement modern medicine...it is not a replacement for Western medicine, but another way to support your health"。E选项"In conclusion, TCM offers a holistic approach to health"（总之，中医药提供整体健康观）用"In conclusion"总结全文，"holistic approach"与空后complement modern medicine、another way to support your health形成呼应，收束有力。
- **干扰项分析**：
  - **F. For example, some people use TCM when they have a cold or flu.**：涉及感冒时使用中医药，易被误填[1]或[4]。但F仅为使用场景举例，而空[1]侧重TCM整体理念，空[4]侧重饮食观；F属"主题相关但论述层级过窄"型干扰，与各空主旨不符。
