06-27 第一篇

Fire Safety: Knowledge That Can Save Lives

Fires can happen anywhere—at home, at school, or in public places. They spread quickly and can cause serious harm. [1] That is why learning basic fire safety is important for everyone, young and old. Knowing how to prevent fires, what to do when they happen, and how to escape safely can make the difference between life and death. Fire drills（消防演习）at school are not just exercises; they prepare you for real emergencies. This article will help you understand the key points of fire safety.

Prevention is the first step. [2] Most home fires start in the kitchen—never leave cooking unattended, and keep things that burn away from the stove. Do not overload（过载）electrical sockets; too many plugs in one place can cause overheating and fire. Candles should be used with care and never left burning when you leave a room. Smoking indoors is dangerous; if someone in your home smokes, make sure cigarettes are fully put out. Check your smoke alarms regularly and change the batteries when needed. Small habits like these can prevent big disasters.

If a fire starts, act quickly and calmly. [3] First, shout "Fire!" to alert others. If there is smoke, stay low—smoke rises, so clean air is closer to the floor. Feel closed doors with the back of your hand before opening; if the door is hot, do not open it—find another way out. Use a wet towel over your nose and mouth to reduce smoke inhalation（吸入）. Never use the lift in a fire; always use the stairs. Have a meeting point outside so your family knows where to gather. Every second counts when escaping.

Sometimes you cannot escape. [4] If you are trapped in a room, close the door and block gaps under it with wet cloth to keep smoke out. Call the fire brigade（消防队）or your emergency number and tell them your exact location. Wave something bright at the window to attract rescuers. Stay near the window for fresh air if possible. Do not jump from a high floor unless firefighters are there to catch you. Staying put and signalling for help is often safer than trying to escape alone.

[5] Fire safety is not something to learn once and forget. Review these rules with your family and practise your escape plan. Check smoke alarms and fire extinguishers（灭火器）at home. When you stay in a hotel or visit a new building, notice where the fire exits are. The more you prepare, the safer you and your loved ones will be. Remember: prevention and preparation can save lives.

选项

A. That is why learning basic fire safety is important for everyone—prevention, response, and escape skills can save lives. B. Prevent fires by being careful in the kitchen, avoiding

overloaded sockets, using candles safely, and checking smoke alarms. C. When fire starts, alert others, stay low in smoke, check doors before opening, and use stairs—never the lift. D. If trapped, close the door, block gaps, call for help, signal at the window, and wait for rescue instead of risking a dangerous escape. E. Fire safety requires ongoing attention—practise with your family, check equipment, and notice fire exits when you travel. F. For example, firefighter uniforms are made of special materials that resist heat.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：空前描述"Fires can happen anywhere—home, school, public...spread quickly...serious harm"，空后说明"Knowing how to prevent fires, what to do when happen, how to escape safely...life and death...Fire drills at school...prepare for real emergencies...key points"。A选项"That is why learning basic fire safety is important for everyone—prevention, response, and escape skills can save lives"（因此学习基本消防安全对每个人都很重要——预防、应对和逃生技能能救命）中"That is why"承接空前因果，"prevention, response, escape...save lives"与空后"prevent...what to do...escape safely...life and death"精准呼应，衔接顺畅。
- **[2] B**：
  - **线索**：空前提出"Prevention is the first step"，空后详述"Most home fires kitchen—never leave cooking unattended...keep burnable away from stove...Do not overload electrical sockets...overheating, fire...Candles with care, never leave burning...Smoking indoors dangerous...cigarettes fully put out...Check smoke alarms, change batteries...Small habits prevent big disasters"。B选项"Prevent fires by being careful in the kitchen, avoiding overloaded sockets, using candles safely, and checking smoke alarms"（通过厨房小心、避免插座过载、安全使用蜡烛、检查烟雾报警器来预防火灾）中"kitchen...overloaded sockets...candles...smoke alarms"与空后内容完美对应，逻辑紧密。
- **[3] C**：
  - **线索**：空前提出"If a fire starts, act quickly and calmly"，空后列举"Shout Fire!...alert others...smoke—stay low...smoke rises, clean air near floor...Feel doors with back of hand...hot—do not open...another way...wet towel nose, mouth...reduce smoke...Never use lift...always stairs...meeting point outside...Every second counts"。C选项"When fire starts, alert others, stay low

in smoke, check doors before opening, and use stairs—never the lift"（火灾发生时，提醒他人，在烟中低身，开门前检查门温，走楼梯——绝不用电梯）中"alert...stay low...check doors...stairs...never lift"与空后内容精准对应，衔接自然。

- [4] D：
  - **线索**：空前提出"Sometimes you cannot escape"，空后描述"If trapped...close door, block gaps with wet cloth...keep smoke out...Call fire brigade, emergency number...exact location...Wave bright at window...attract rescuers...Stay near window...fresh air...Do not jump from high floor unless firefighters catch...Staying put, signalling...safer than escaping alone"。D选项"If trapped, close the door, block gaps, call for help, signal at the window, and wait for rescue instead of risking a dangerous escape"（若被困，关门、堵缝隙、求助、在窗口示意，等待救援而非冒险逃生）中"close door...block gaps...call...signal...wait for rescue...instead of dangerous escape"与空后表述完美对应，衔接得当。
- [5] E：
  - **线索**：空[5]位于结尾段段首，空后为"Fire safety is not something to learn once and forget. Review these rules with your family and practise your escape plan. Check smoke alarms and fire extinguishers at home. When you stay in a hotel or visit a new building, notice where the fire exits are. The more you prepare, the safer you and your loved ones will be. Remember: prevention and preparation can save lives."。E选项"Fire safety requires ongoing attention—practise with your family, check equipment, and notice fire exits when you travel"（消防安全需要持续关注——与家人演练、检查设备、出行时留意消防出口）用"ongoing attention...practise...check equipment...notice fire exits"总结主题，与空后"not learn once and forget...review...practise...check...notice fire exits"形成呼应，收束精准。
- **干扰项分析**：
  - **F. For example, firefighter uniforms are made of special materials that resist heat.**：涉及消防服防热材料，易被误填[2]或[4]。但F以"For example"引出消防员装备细节，而空[2]讨论家庭防火预防措施，F的"firefighter uniforms"与"kitchen...sockets...candles...smoke alarms"的预防焦点不同；空[4]讨论被困时的自救与求救，F未涉及被困情境。F属"主题相关但论述层次错位"型干扰。
