# 06-28 第一篇

**The Value of Botanical Gardens**

Botanical gardens are more than pretty places to walk. They are living museums of plants—scientific, educational, and beautiful. [1] In short, they collect, grow, and display plants from around the world for research, teaching, and the public to enjoy. From tiny mosses（苔藓）to tall trees, from common flowers to rare species that are almost extinct, botanical gardens protect and showcase the richness of plant life. They have existed for hundreds of years, and today they play an even greater role in a world facing climate change and habitat loss.

Botanical gardens support science and conservation. [2] Scientists study plants in gardens to understand how they grow, adapt, and interact with other living things. Seeds from rare or endangered plants are often stored in seed banks so that future generations can restore them if they disappear in the wild. Many gardens work with universities and research centres to develop new medicines from plants or to find crops that can grow in dry or salty soils. By sharing data and specimens（标本）with each other, gardens around the world help protect plant diversity. This work is vital for food security and for saving species.

Education is at the heart of botanical gardens. [3] Schools bring students on visits to learn about plant life cycles, ecosystems, and the importance of protecting nature. Gardens offer workshops, guided tours, and signs that explain each plant's name, origin, and uses. Children can touch leaves, smell flowers, and see insects that depend on plants—experiences that books and screens cannot replace. For many people, a first visit to a botanical garden sparks a lifelong interest in plants and the environment. Learning in a real, living setting makes knowledge stick.

Gardens also provide space for relaxation and health. [4] Spending time among trees and flowers can reduce stress, lower blood pressure, and improve mood. In busy cities, botanical gardens are quiet places where people can escape noise and traffic. Families picnic on the grass; artists draw and paint; visitors simply stroll and breathe. Some gardens even offer "forest bathing"（森林浴）—the practice of walking slowly in a woodland to relax the mind. Whether for science, learning, or rest, botanical gardens serve the whole community.

[5] Botanical gardens remind us that plants are the base of life—they give us food, air, and beauty. As cities grow and nature shrinks, these gardens become more important than ever. The next time you pass a botanical garden, consider stepping in. You might discover a new favourite flower, learn something surprising, or simply enjoy a peaceful hour among the green. A visit is a small step toward appreciating and protecting the natural world.

## 选项

A. In short, they collect, grow, and display plants from around the world for research, teaching, and the public to enjoy. B. Scientists study plants, store seeds, develop medicines, and work together globally to protect plant diversity. C. Schools use gardens for visits and workshops; hands-on learning in real settings sparks lasting interest in nature. D. Gardens offer stress relief, quiet in cities, and spaces for families, artists, and visitors to relax and recharge. E. Botanical gardens show that plants are the base of life—as nature shrinks, these spaces become ever more vital. F. For example, the oldest botanical garden in the world is in Italy and was founded in 1545.

## 答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

## 深度解析

- **[1] A**：
  - **线索**：空前描述"Botanical gardens more than pretty places...living museums of plants—scientific, educational, beautiful"，空后说明"From tiny mosses to tall trees...common flowers to rare, almost extinct...protect and showcase richness of plant life...existed hundreds of years...greater role...climate change, habitat loss"。A选项"In short, they collect, grow, and display plants from around the world for research, teaching, and the public to enjoy"（简言之，它们收集、培育并展示世界各地的植物，用于研究、教学和公众欣赏）中"In short"概括空前，"collect, grow, display...research, teaching, public"与空后"mosses to trees...rare species...protect...scientific, educational"精准呼应，衔接顺畅。
- **[2] B**：
  - **线索**：空前提出"Botanical gardens support science and conservation"，空后详述"Scientists study plants...how grow, adapt, interact...Seeds from rare, endangered stored in seed banks...restore if disappear...work with universities, research...new medicines, crops for dry, salty soils...sharing data, specimens...gardens worldwide protect plant diversity...vital for food security, saving species"。B选项"Scientists study plants, store seeds, develop medicines, and work together globally to protect plant diversity"（科学家研究植物、储存种子、开发药物，并在全球合作保护植物多样性）中"study...store seeds...develop medicines...work together globally...protect diversity"与空后内容完美对应，逻辑紧密。
- **[3] C**：

- **线索**：空前提出"Education is at the heart of botanical gardens"，空后列举"Schools bring students...plant life cycles, ecosystems, importance of protecting nature...workshops, guided tours, signs...name, origin, uses...Children touch leaves, smell flowers, see insects...experiences books, screens cannot replace...first visit sparks lifelong interest...Learning in real, living setting makes knowledge stick"。C选项"Schools use gardens for visits and workshops; hands-on learning in real settings sparks lasting interest in nature"（学校利用植物园开展参观和活动；实境动手学习激发对自然的持久兴趣）中"schools...visits, workshops...hands-on...real settings...sparks lasting interest"与空后内容精准对应，衔接自然。

- **[4] D**：
  - **线索**：空前提出"Gardens also provide space for relaxation and health"，空后描述"Time among trees, flowers...reduce stress, lower blood pressure, improve mood...busy cities...quiet places...escape noise, traffic...Families picnic...artists draw...visitors stroll, breathe...forest bathing...walk slowly in woodland...relax mind...science, learning, or rest...serve whole community"。D选项"Gardens offer stress relief, quiet in cities, and spaces for families, artists, and visitors to relax and recharge"（植物园提供减压、城市中的宁静，以及供家庭、艺术家和访客放松休息的空间）中"stress relief...quiet...families, artists, visitors...relax, recharge"与空后表述完美对应，衔接得当。

- **[5] E**：
  - **线索**：空[5]位于结尾段段首，空后为"Botanical gardens remind us that plants are the base of life—they give us food, air, and beauty. As cities grow and nature shrinks, these gardens become more important than ever. The next time you pass a botanical garden, consider stepping in. You might discover a new favourite flower, learn something surprising, or simply enjoy a peaceful hour among the green. A visit is a small step toward appreciating and protecting the natural world."。E选项"Botanical gardens show that plants are the base of life—as nature shrinks, these spaces become ever more vital"（植物园表明植物是生命的基础——随着自然缩减，这些空间变得愈发重要）用"plants base of life...nature shrinks...ever more vital"总结主题，与空后"plants base of life...nature shrinks...more important than ever"形成呼应，收束精准。

- **干扰项分析**：
  - **F. For example, the oldest botanical garden in the world is in Italy and was founded in 1545.**：涉及意大利最古植物园及成立年份，易被误填[1]。但F以"For example"引出历史个案，而空[1]讨论植物园的总体功能（收集、展示、研究、教学、公众欣赏），F的"oldest...Italy...1545"属于趣味史实，与"collect, grow, display...research, teaching"的功能概括焦点不同；F未概括植物园的核心价值。F属"主题相关但论述层次错位"型干扰。
