07-02 第一篇

The Importance of Sleep for Teenagers

Sleep is essential for good health, especially during the teenage years. While you sleep, your body repairs itself, your brain organises memories, and your emotions reset for the next day. [1] Put simply, sleep is not a waste of time—it is one of the most productive things your body does. Yet many teenagers do not get enough sleep, often staying up late for homework, social media, or gaming. Experts recommend eight to ten hours of sleep per night for teenagers, but studies show most get far less. This article explains why sleep matters and how to improve it.

Sleep helps your body grow and stay healthy. [2] During deep sleep, your body releases growth hormones that help muscles, bones, and tissues develop. Your immune system also strengthens while you rest, making you less likely to catch colds or infections. Athletes who sleep well recover faster and perform better. Without enough sleep, your body cannot repair the small damage caused by daily activity. Over time, poor sleep habits can lead to weight gain, weakened immunity, and even long-term health problems. Getting enough rest is one of the simplest and most effective ways to look after your physical health.

Sleep is vital for your brain and learning. [3] While you sleep, your brain processes the information you learned during the day, moving it from short-term to long-term memory. This is why a good night's sleep before an exam is often more helpful than last-minute cramming（临时抱佛脚）. Sleep also improves concentration, creativity, and decision-making. Students who sleep well tend to have better grades, not because they study more, but because their brains work more efficiently. On the other hand, sleep deprivation can make you forgetful, unfocused, and slow to react—exactly the opposite of what you need in school.

Poor sleep affects your mood and relationships. [4] When you are tired, you are more likely to feel irritable, anxious, or sad. Small problems can seem much bigger when you have not slept enough. This can lead to arguments with friends or family, difficulty concentrating in class, and a general feeling of being overwhelmed. Chronic sleep loss has been linked to higher rates of depression and anxiety in teenagers. Simply improving your sleep can make you feel calmer, more patient, and better able to handle daily challenges. Your emotional health and your sleep quality are closely connected.

[5] Improving your sleep starts with small, consistent changes. Try to go to bed and wake up at the same time every day, even on weekends. Avoid screens for at least thirty minutes before bed, as the blue light they emit can delay sleep. Keep your bedroom cool, dark, and quiet. Avoid caffeine in the afternoon and evening. If your mind races at night, try writing down your worries or plans before bed to clear your head. Good sleep is not a

luxury—it is a necessity. Make it a priority, and you will feel the difference in your health, your mood, and your performance.

选项

A. Put simply, sleep is not a waste of time—it is one of the most productive things your body does. B. Deep sleep triggers growth hormones, strengthens immunity, and helps your body repair—good rest is the foundation of physical health. C. Sleep consolidates memories and sharpens focus—a well-rested brain learns faster and performs better than a tired one. D. Lack of sleep makes you irritable and anxious, strains relationships, and is linked to depression—sleep quality and emotional health go hand in hand. E. Build a consistent sleep routine—fixed times, no screens before bed, a cool dark room—and enjoy better health, mood, and performance. F. For example, napping for twenty minutes in the afternoon can help you feel more alert for the rest of the day.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：空前描述"Sleep is essential...body repairs, brain organises memories, emotions reset"，空后说明"many teenagers do not get enough sleep...staying up late...homework, social media, gaming...experts recommend eight to ten hours"。A选项"Put simply, sleep is not a waste of time—it is one of the most productive things your body does"（简单来说，睡眠不是浪费时间——它是身体做的最有成效的事之一）中"Put simply"承接空前概述，"not a waste of time...most productive"与空后"many teenagers do not get enough"形成转折铺垫，衔接顺畅。
- **[2] B**：
  - **线索**：空前提出"Sleep helps your body grow and stay healthy"，空后详述"During deep sleep—growth hormones...muscles, bones, tissues...immune system strengthens...less likely colds, infections...Athletes recover faster, perform better...Without enough—cannot repair...weight gain, weakened immunity, long-term problems...simplest, most effective...physical health"。B选项"Deep sleep triggers growth hormones, strengthens immunity, and helps your body repair—good rest is the foundation of physical health"（深度睡眠触发生长激素、增强免疫力、帮助身体修复——良好的休息是身体健康的基础）中"growth hormones...immunity...repair...physical health"与空后内容完美对应，逻辑紧密。

- [3] C：
  - **线索**：空前提出"Sleep is vital for your brain and learning"，空后列举"Brain processes information...short-term to long-term memory...good night's sleep before exam more helpful than cramming...concentration, creativity, decision-making...better grades...brains work more efficiently...sleep deprivation—forgetful, unfocused, slow"。C选项"Sleep consolidates memories and sharpens focus—a well-rested brain learns faster and performs better than a tired one"（睡眠巩固记忆、提升专注力——休息好的大脑比疲惫的大脑学得更快、表现更好）中"consolidates memories...sharpens focus...well-rested brain...learns faster, performs better"与空后内容精准对应，衔接自然。
- [4] D：
  - **线索**：空前提出"Poor sleep affects your mood and relationships"，空后描述"Tired—irritable, anxious, sad...small problems seem bigger...arguments friends, family...difficulty concentrating...feeling overwhelmed...Chronic sleep loss—depression, anxiety...improving sleep—calmer, patient, better handle challenges...emotional health and sleep quality closely connected"。D选项"Lack of sleep makes you irritable and anxious, strains relationships, and is linked to depression—sleep quality and emotional health go hand in hand"（睡眠不足让你烦躁焦虑、影响人际关系、与抑郁相关——睡眠质量和情绪健康紧密相连）中"irritable, anxious...strains relationships...depression...sleep quality, emotional health"与空后表述完美对应，衔接得当。
- [5] E：
  - **线索**：空[5]位于结尾段段首，空后为"Improving your sleep starts with small, consistent changes. Try to go to bed and wake up at the same time every day, even on weekends. Avoid screens for at least thirty minutes before bed...Keep bedroom cool, dark, quiet...Avoid caffeine...writing down worries...Good sleep is not a luxury—it is a necessity. Make it a priority...feel the difference in health, mood, performance."。E选项"Build a consistent sleep routine—fixed times, no screens before bed, a cool dark room—and enjoy better health, mood, and performance"（建立稳定的睡眠习惯——固定时间、睡前不看屏幕、凉爽暗室——享受更好的健康、情绪和表现）用"consistent routine...fixed times...no screens...cool dark room...health, mood, performance"总结主题，与空后内容形成呼应，收束精准。
- **干扰项分析**：
  - **F. For example, napping for twenty minutes in the afternoon can help you feel more alert for the rest of the day.**：涉及午睡的好处，易被误填[2]或[5]。但F以"For example"引出午睡策略，而空[2]讨论夜间深度睡眠的身体修复功能（生长激素、免疫力），F的"napping...afternoon"属于白天补觉，与"deep sleep...growth hormones...immunity"的夜间机制焦点不同；空[5]讨论晚间睡眠改

善策略，F的午睡建议与"go to bed...same time...avoid screens...before bed"的晚间习惯焦点不同。F属"主题相关但论述层次错位"型干扰。
