08-22 第二篇

How to Stay Focused

Staying focused is one of the biggest challenges students face today. With smartphones, social media, and endless notifications, our attention is constantly pulled in different directions. Studies show that the average person checks their phone dozens of times a day. [1] Learning to control these distractions is the first step toward better concentration and higher productivity. This skill becomes more important as we take on harder tasks in school and life.

Your environment plays a huge role in your ability to focus. A cluttered desk or a noisy room can make it hard to concentrate. [2] Create a quiet, clean workspace where you can work without interruption. Put your phone in another room or turn it off. Tell family members when you need study time. Small changes like these can greatly improve your focus and help you get more done in less time.

Another key is to break your work into smaller chunks. The brain works better when it has clear, achievable goals. [3] Set a timer for 25 minutes and work on one task only, then take a short break. This method, often called the Pomodoro Technique, keeps your mind fresh and prevents burnout. Many students find that they complete homework faster when they use this approach.

Your body and mind are connected. Poor sleep, unhealthy food, and lack of exercise all harm your focus. [4] Getting enough rest, eating well, and moving your body regularly will sharpen your concentration. Drink plenty of water and avoid too much sugar, which can cause energy crashes. When you take care of your body, your mind follows.

[5] Focus is not something you are born with—it is a skill you can develop. Start with small habits: put your phone away during meals, finish one task before starting another, and practice deep breathing when you feel distracted. Over time, these habits will strengthen your ability to concentrate. Remember, every expert was once a beginner who chose to practice.

选项

A. Managing these distractions is essential for improving concentration and getting more done. B. Design a dedicated study area that is free from noise and visual clutter. C. Work in short, timed blocks with breaks in between to maintain mental energy. D. Physical health directly affects mental clarity and the ability to stay focused. E. Anyone can improve their focus through consistent practice and simple daily habits. F. For example, some students find that listening to soft music helps them concentrate better.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：空前描述手机、社交媒体、通知不断分散注意力，以及人们每天频繁看手机；空后强调“这是走向更好专注和更高效率的第一步”。A项“控制这些干扰对于提升专注和完成更多事情至关重要”承上概括干扰问题，启下引出专注的重要性，衔接自然。
- **[2] B**：
  - **线索**：空前讲杂乱书桌和吵闹房间影响专注；空后具体建议创造安静、整洁的学习空间，把手机放别处等。B项“设计一个没有噪音和视觉杂物的专用学习区”概括本段核心建议，与前后内容一致。
- **[3] C**：
  - **线索**：空前讲将工作分成小块、设定清晰目标；空后介绍番茄工作法（25分钟专注+短暂休息）。C项“以短时、定时的工作块配合休息来保持思维活力”准确概括该方法及其目的。
- **[4] D**：
  - **线索**：空前提到睡眠差、饮食不健康、缺乏运动损害专注；空后建议充足休息、良好饮食、规律运动来提升专注。D项“身体健康直接影响思维清晰度和保持专注的能力”总结因果关系，与段落逻辑吻合。
- **[5] E**：
  - **线索**：空前为第四段；空后提出从小习惯开始、逐步强化专注力的具体做法。E项“任何人都可以通过持续练习和简单的日常习惯提升专注力”作为结尾段主题句，总结全文并呼应“可培养的技能”这一观点。
- **干扰项分析**：
  - **F. For example, some students find that listening to soft music helps them concentrate better.**：以For example开头，是具体方法举例。虽与专注主题相关，但属于细节层面，无法承担[1]–[5]的概括或承递功能；且与各空位前后句逻辑不匹配，易被误选为[2]或[3]。
