The Power of Curiosity: Why Asking Questions Matters

Curiosity is the desire to learn and understand new things. It drives scientists to explore the universe, artists to experiment with new styles, and students to dig deeper into subjects they find interesting. When we are curious, our brains become more active and we remember information better. Studies have shown that curious people often achieve higher grades and feel more satisfied with their learning. [1] Curiosity is not just a feeling—it is a powerful tool that helps us grow, discover, and connect with the world around us.

In the classroom, curiosity can turn a boring lesson into an exciting adventure. Instead of simply memorizing facts, curious students ask "why" and "how" questions. They connect new ideas to what they already know and look for patterns. Teachers who encourage curiosity often see their students become more engaged and creative. When students feel safe to ask questions, they develop a lifelong love of learning. [2] A curious mind does not accept surface-level answers; it seeks deeper understanding and finds joy in the process of discovery.

Curiosity also helps us in everyday life. It leads us to try new foods, visit new places, and meet people with different backgrounds. Curious people are often more open-minded and less likely to judge others too quickly. They tend to solve problems more creatively because they are willing to look at situations from different angles. [3] In this way, curiosity builds bridges between people and ideas, making our lives richer and more meaningful.

However, curiosity needs to be balanced with care. Asking too many questions at the wrong time can sometimes annoy others. It is also important to check whether the information we find is reliable, especially when we search online. [4] Learning when and how to be curious—and when to pause—is part of becoming a thoughtful and respectful learner.

In a world full of information, curiosity helps us choose what to learn and what to explore next. It keeps us from feeling bored or stuck. Whether we are young or old, curiosity reminds us that there is always something new to discover. [5] By nurturing our curiosity, we open the door to a lifetime of learning, growth, and wonder.

选项

A. Curiosity is not just a feeling—it is a powerful tool that helps us grow, discover, and connect with the world around us. B. A curious mind does not accept surface-level answers; it seeks deeper understanding and finds joy in the process of discovery. C. In

this way, curiosity builds bridges between people and ideas, making our lives richer and more meaningful. D. Learning when and how to be curious—and when to pause—is part of becoming a thoughtful and respectful learner. E. By nurturing our curiosity, we open the door to a lifetime of learning, growth, and wonder. F. For instance, Albert Einstein often said that he had no special talent except for being passionately curious.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：空前介绍好奇心定义——渴望学习理解、驱动科学家艺术家学生、激活大脑、提高记忆和成绩，空后需提升概括好奇心的作用。A的"not just a feeling—it is a powerful tool"与前文"desire"呼应，"helps us grow, discover, and connect with the world"概括好奇心的多重价值。
- **[2] B**：
  - **线索**：空前描述课堂中的好奇心——问为什么和怎样、联系已知、寻找规律、学生更投入有创意、爱上学习，空后需总结好奇心的学习态度。B的"does not accept surface-level answers"与"memorizing facts"形成对比，"seeks deeper understanding and finds joy in discovery"与本段课堂探索行为呼应。
- **[3] C**：
  - **线索**：空前列举日常生活中好奇心的好处——尝试新事物、接触不同背景的人、更开放、更有创造力，空后需总结好奇心的社会意义。C的"builds bridges between people and ideas"与前文开放心态、多元接触对应，"makes our lives richer and more meaningful"是对本段内容的概括升华。
- **[4] D**：
  - **线索**：空前指出好奇心的局限——不当提问可能打扰他人、网络信息需核实，空后需提出平衡与反思。D的"Learning when and how to be curious—and when to pause"针对前文问题提出对策，"thoughtful and respectful learner"点明成熟好奇心的内涵。
- **[5] E**：
  - **线索**：空前总结好奇心在信息时代的作用——帮助选择学习内容、避免无聊和停滞、终身适用，空后需收束全文并展望。E的"By nurturing our curiosity"承接前文讨论，"a lifetime of learning, growth, and wonder"是全文的理想收尾。

- **干扰项分析**：
    - **F. For instance, Albert Einstein often said that he had no special talent except for being passionately curious.**：以For instance开头，为名人名言类具体案例。各空均为概括或过渡句；[1]易被误选因涉及好奇心的力量，但该空需对前文多角度描述做抽象概括，而非引用爱因斯坦的个例。
