Rock Climbing: Challenge Yourself on the Wall

Rock climbing has grown from a niche sport into a popular activity enjoyed by people of all ages. It can be practiced indoors on artificial walls or outdoors on real rock faces. Climbing combines physical strength, balance, problem-solving, and focus. Each route is like a puzzle: you must figure out where to place your hands and feet to reach the top. [1]

Indoor climbing gyms have made the sport more accessible. Walls come in many heights and difficulties, from easy routes for beginners to challenging overhangs for experts. Climbing shoes, a harness, and chalk are the main gear. Staff are usually on hand to teach basic skills and ensure safety. [2]

Safety is always the top priority. Climbers use ropes, harnesses, and belay devices to prevent falls. Learning to tie knots and belay—controlling the rope for a partner—are essential skills. Climbers also learn to communicate clearly with their partners. A simple mistake can lead to serious injury, so attention to detail matters. [3]

Climbing builds both body and mind. It strengthens muscles, especially in the arms, core, and legs. It also requires mental focus—you must stay calm when you are high above the ground and think clearly about your next move. Many climbers say the sport teaches them to push through fear and doubt. [4]

Whether you climb for fun, fitness, or adventure, rock climbing offers a unique mix of challenge and reward. Reaching the top of a difficult route brings a strong sense of achievement. Even when you fall, you learn something and try again. [5]

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- [1] A：
  - **线索**：空前介绍攀岩从小众到普及、室内外均可、结合力量平衡解题与专注、路线如谜题需规划手脚，空后需总结攀岩的身心考验与乐趣。A的"tests your body and mind"与"physical strength, balance, problem-solving, and focus"呼应，"thrill of overcoming obstacles one move at a time"与前文"puzzle"对应。
- [2] B：
  - **线索**：空前说室内攀岩馆使运动更易接触、多种难度、主要装备、有工作人员教学与保障安全，空后需总结室内馆的入门价值。B的"Thanks to these gyms"指代前文，"anyone curious about climbing can try it in a safe and controlled environment"与前文对应。
- [3] C：
  - **线索**：空前强调安全首位、绳索 harness 与保护器、学习结绳与保护、清晰沟通、疏忽可能导致重伤，空后需总结安全培训的重要性。C的"For this reason"承接前文，"proper training and a focus on safety should never be overlooked"与前文呼应。
- [4] D：
  - **线索**：空前说攀岩锻炼身心、增强肌肉、需心智专注、高处保持冷静与清晰思考、许多人称学会克服恐惧与怀疑，空后需总结攀岩的心智价值。D的"In this way"承接前文，"more than exercise—it becomes a practice in mental strength and perseverance"与前文对应。
- [5] E：
  - **线索**：空前说无论为乐趣健身或冒险、攀岩提供独特挑战与回报、登顶带来成就、失败后学习再试，空后需总结重复参与的动力。E的"That combination of effort, failure, and success"指代前文，"what keeps many people coming back to the wall"与前文呼应。
- **干扰项分析**：
  - **F. For example, bouldering is a form of climbing...**：以For example开头，为具体攀岩形式案例（抱石）。各空均为概括或过渡句；[2]易被误选因涉及攀岩类型，但该空需总结室内馆的入门与安全环境价值，而非补充抱石这一形式的细节。
