12-11 第二篇

Urban Planning: Designing Cities for People

Urban planning is the process of designing and managing how cities grow and function. It involves decisions about where to build homes, roads, parks, schools, and factories. Good planning can make cities more liveable, efficient, and sustainable. Poor planning can lead to traffic jams, pollution, and neighbourhoods where people struggle to meet their basic needs. [1]

Cities face many challenges as they grow. Population increase puts pressure on housing, transport, and public services. Land is limited, so planners must decide how to use space wisely. They must balance economic development with environmental protection. They also need to think about who benefits from new projects—and who might be left behind. [2]

Green spaces are essential in urban planning. Parks, trees, and gardens provide places for exercise, relaxation, and community events. They help reduce heat in summer, improve air quality, and support wildlife. Cities with more green space often report better mental health and higher property values. Integrating nature into cities makes them more pleasant and resilient. [3]

Transport is another key area. Well-designed public transport reduces traffic and pollution. Bike lanes and pedestrian-friendly streets encourage healthier and cleaner ways to get around. Some cities are experimenting with car-free zones or low-emission areas. The goal is to move more people with fewer vehicles and less environmental impact. [4]

Urban planning requires input from many people. Planners, engineers, and officials work with residents, businesses, and community groups. Public meetings and surveys help gather ideas and concerns. When citizens participate, planning is more likely to reflect their needs and create cities where everyone can thrive. [5]

选项

A. For this reason, urban planning has a direct impact on the quality of life in cities. B. These challenges require careful decisions and long-term vision. C. In this way, nature becomes a vital part of a healthy and attractive city. D. These approaches show that transport planning can support both people and the planet. E. That is why public participation is so important in the planning process. F. For example, Copenhagen is known for its extensive network of bicycle lanes.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：空前介绍城市规划——设计与管理城市发展的过程、涉及住房道路公园学校工厂布局、好的规划使城市更宜居高效可持续、差的规划导致拥堵污染与难以满足基本需求，空后需总结规划对城市生活质量的影响。A的"For this reason"承接前文，"direct impact on the quality of life in cities"与前文对应。
- **[2] B**：
  - **线索**：空前说城市增长面临诸多挑战——人口增加对住房交通与公共服务施压、土地有限须合理用地、需平衡经济发展与环境保护、考虑谁受益谁被忽视，空后需总结应对挑战所需的能力。B的"These challenges"指代前文，"require careful decisions and long-term vision"与前文呼应。
- **[3] C**：
  - **线索**：空前说绿地在城市规划中必不可少——公园树木花园供锻炼休闲与社区活动、降温改善空气支持野生动物、更多绿地常伴随更好心理健康与房产价值、将自然融入城市使其更宜居更有韧性，空后需总结自然与健康城市的关系。C的"In this way"承接前文，"nature becomes a vital part of a healthy and attractive city"与前文对应。
- **[4] D**：
  - **线索**：空前说交通是另一关键——良好的公交减少交通与污染、自行车道与步行街促进健康清洁出行、部分城市试行无车区或低排放区、目标是以更少车辆和更低环境影响运送更多人，空后需总结交通规划的双重效益。D的"These approaches"指代前文，"transport planning can support both people and the planet"与前文呼应。
- **[5] E**：
  - **线索**：空前说城市规划需多方参与——规划师工程师官员与居民企业及社区合作、公众会议与调查收集意见与关切、市民参与使规划更反映需求并营造人人可发展的城市，空后需总结公众参与的重要性。E的"That is why public participation is so important in the planning process"与前文对应。
- **干扰项分析**：

- **F. For example, Copenhagen is known for its extensive network of bicycle lanes**：以For example开头，为具体城市案例（哥本哈根自行车道）。各空均为概括或过渡句；[4]易被误选因涉及自行车，但该空需总结交通规划对人与环境的整体支持，而非补充单一城市的举例。
