12–13 第一篇

Bike Sharing: Pedaling Toward a Greener Future

Bike sharing has quickly become a common sight in cities around the world. Users can unlock a bicycle with a smartphone app, ride to their destination, and leave the bike at any station or in a designated area. No need to own a bike or worry about parking. This system offers a convenient way to get around for short trips. It is especially popular for the "last mile" between public transport stops and home or work. [1]

The benefits go beyond convenience. Bikes produce no air pollution and help reduce traffic. They take up less space than cars, so cities can use roads more efficiently. Riding a bike is good exercise and can improve physical health. For many people, bike sharing has become part of their daily routine. It supports a greener and more active lifestyle. [2]

However, bike sharing also brings challenges. Bikes are sometimes left in wrong places, blocking sidewalks or entrances. Vandalism and theft have been problems in some cities. Companies must keep bikes in good condition and redistribute them where demand is high. Finding a balance between convenience and order is an ongoing task. [3]

Technology has made bike sharing smarter. Apps show where bikes are available and allow easy payment. Some systems use GPS to track bikes and prevent misuse. Electric bikes extend the range of shared bikes and help riders tackle hills. As cities grow, bike sharing is likely to play an even bigger role in urban transport. [4]

Bike sharing shows that simple ideas can change how we move. It connects people with public transport and gives them a flexible, low–cost option for getting around. With better planning and rules, it can make our cities cleaner and more livable. [5]

选项

A. Bike sharing offers a simple, flexible way to travel short distances without owning a bicycle. B. For these reasons, bike sharing supports both the environment and personal health. C. City planners and companies must work together to solve these problems. D. New technology continues to improve the service and user experience. E. When managed well, bike sharing can make urban life more sustainable and enjoyable. F. For example, some cities have introduced "dockless" bikes that can be parked almost anywhere, though this has raised concerns about clutter.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- [1] A：
  - **线索**：空前介绍共享单车普及、用手机解锁、骑到目的地后停放、无需拥有、便捷短途出行、解决最后一公里，空后需总结共享单车的便利性。A的"offers a simple, flexible way to travel short distances without owning a bicycle"与前文对应。
- [2] B：
  - **线索**：空前说不止便利、无污染减拥堵、占地少、有益健康、成为日常、支持绿色积极生活方式，空后需总结环保与健康效益。B的"For these reasons, bike sharing supports both the environment and personal health"与前文呼应。
- [3] C：
  - **线索**：空前说面临挑战、乱停阻挡、 vandalism 盗窃、需维护与调度、便利与秩序需平衡，空后需总结解决问题的责任。C的"City planners and companies must work together to solve these problems"与前文对应。
- [4] D：
  - **线索**：空前说技术使共享单车更智能、应用显示可用车与支付、GPS防滥用、电动自行车扩展范围，空后需总结技术推动发展。D的"New technology continues to improve the service and user experience"与前文呼应。
- [5] E：
  - **线索**：空前说共享单车体现简单想法改变出行、连接公共交通、低成本灵活、更好规划与规则可让城市更清洁宜居，空后需总结管理良好的前景。E的"When managed well, bike sharing can make urban life more sustainable and enjoyable"与前文对应。
- **干扰项分析**：
  - **F. For example, some cities have introduced "dockless" bikes...**：以For example开头，为具体形式案例（无桩共享单车）。各空均为概括或过渡句；[3]易被误选因涉及停放问题，但该空需总结多方合作解决问题，而非补充无桩模式的细节。
