12-17 第一篇

First Aid Basics: What Everyone Should Know

First aid is the immediate help given to someone who is injured or suddenly ill before professional medical care arrives. You do not need to be a doctor to save a life. Basic first aid skills can make a huge difference in emergencies. Learning a few simple steps can prepare you to act when it matters most. Every minute counts when someone's life or health is at risk. [1]

The most important skill is calling for help. In many countries, dial 120 for an ambulance. Tell the operator your location clearly and describe what happened. Stay on the line—they may guide you through steps while waiting for help. If someone is unconscious and not breathing, CPR can keep blood flowing to the brain until paramedics arrive. Many community centers offer free CPR courses. [2]

For cuts and bleeding, apply direct pressure with a clean cloth or bandage. Elevate the wound if possible. For burns, run cool water over the area for at least 10 minutes—do not use ice. For choking, the Heimlich maneuver can dislodge an object from the airway. Each situation requires specific actions, but staying calm and acting quickly is key. [3]

A first aid kit should be in every home, car, and workplace. It should include bandages, gauze, tape, scissors, gloves, and pain relievers. Check the kit regularly and replace used or expired items. Knowing where the kit is and how to use its contents can save precious time. [4]

First aid is not about being perfect—it is about doing something. Even basic knowledge can reduce pain, prevent further injury, or save a life. Taking a first aid course is one of the best investments you can make. [5]

选项

A. First aid is simple but vital—it empowers ordinary people to help in emergencies before professional help arrives. B. Knowing how to get help and perform life-saving steps like CPR can mean the difference between life and death. C. Different injuries need different treatments, but a calm, quick response helps in all cases. D. Being prepared with a well-stocked first aid kit makes it easier to respond when an accident happens. E. Anyone can learn first aid, and doing so is one of the most valuable skills you can acquire. F. For example, the recovery position is used to keep an unconscious but breathing person's airway open and prevent choking.

答案键（Answer Key）

[1] A [2] B [3] C [4] D [5] E

深度解析

- **[1] A**：
  - **线索**：空前介绍急救是专业医疗到达前的即时帮助、无需医生资格可救命、基本技能在紧急关头作用大、学简单步骤可关键时刻行动、分秒必争，空后需总结急救的普适性与重要性。A的"simple but vital—it empowers ordinary people to help in emergencies before professional help arrives"与前文对应。
- **[2] B**：
  - **线索**：空前说首要技能是呼救、拨打120、清晰告知位置与情况、保持通话听从指导、对无意识无呼吸者做CPR、社区有免费课程，空后需总结呼救与急救步骤的意义。B的"Knowing how to get help and perform life-saving steps like CPR can mean the difference between life and death"与前文呼应。
- **[3] C**：
  - **线索**：空前说割伤止血用直接压迫、烧伤冷水冲洗、窒息用海姆立克、不同情况有不同处理、保持冷静快速行动是关键，空后需总结处理原则。C的"Different injuries need different treatments, but a calm, quick response helps in all cases"与前文对应。
- **[4] D**：
  - **线索**：空前说急救箱应放在家车和工作场所、含绷带纱布胶带剪刀手套止痛药、定期检查更换、熟知位置与用法可省时间，空后需总结 preparedness。D的"Being prepared with a well-stocked first aid kit makes it easier to respond when an accident happens"与前文呼应。
- **[5] E**：
  - **线索**：空前说急救不求完美、关键在于行动、基本知识可减痛防伤救命、学习急救课程是最佳投资，空后需总结人人可学与价值。E的"Anyone can learn first aid, and doing so is one of the most valuable skills you can acquire"与前文对应。
- **干扰项分析**：
  - **F. For example, the recovery position...**：以For example开头，为具体急救技术案例（复苏体位）。各空均为概括或过渡句；[3]易被误选因涉及具体技术，但该空需总结不同伤情不同处理与冷静快速反应的通用原则，而非补充某一技术的细节。
