Chinese Tea Culture: A Cup of History

① Tea is one of the most popular drinks in the world, but its story began in China thousands of years ago. People first used tea as medicine, and later they enjoyed it as a daily drink. Today, tea is still an important part of Chinese life and a window for foreigners to understand Chinese culture.

② There are several main kinds of Chinese tea. **Green tea** is light and fresh, and it is often drunk in spring and summer. **Black tea** has a stronger taste and is common in many families in winter. **Oolong tea** sits between green tea and black tea, with a special smell that many tea lovers like.

③ Making tea is simple, but small steps matter. First, warm the cup with hot water. Next, put a little tea into the cup or pot. Then pour in hot water—usually not boiling water for green tea—and wait for one to three minutes. Finally, smell the tea before you taste it slowly. Good tea is not only about the drink; it is also about calm and care.

④ Tea is more than a drink at the table. In many places, offering tea shows respect to guests. Friends may meet in a quiet tea house to talk instead of rushing in a noisy café. On busy days, a short tea break can help people relax and think clearly.

⑤ In recent years, young Chinese people have found new ways to enjoy tea, such as fruit tea and milk tea in shops. These new styles make tea fashion and fun. Still, the old spirit of tea—sharing, peace, and balance—remains in every cup.

注释： *Oolong* 乌龙茶（茶类名称）
