05-08 第2篇

阅读理解（议论文） Should Every School Teach Students Basic First-Aid?

① Last winter, news reports told the story of a 14-year-old boy who saved his grandfather's life with a simple first-aid skill he had learned in a school lesson only three months earlier. Stories like this are becoming more common, yet many Chinese schools still do not offer regular first-aid classes. Some people ask an important question: **should every middle school teach basic first-aid as a required part of the curriculum?** I think the answer is clearly yes.

② First, emergencies happen close to home. A small child can choke on a piece of fruit during a birthday party. An old neighbour can slip on wet tiles in a bathroom. A classmate can fall off a bike and start bleeding. Hospitals and ambulances are wonderful, but they are not always near. In the first few minutes after an accident, the people who are there — often ordinary students — are the first and most important rescuers.

③ Second, basic first-aid skills are **not hard to learn**. In many countries, students aged 12 and above already learn how to call emergency numbers, how to help a choking person, how to press a bleeding wound, and how to place an unconscious friend in a safe side position. These skills can be taught in about ten hours spread over one term, using simple role-plays. Such training can save lives without turning the curriculum upside down.

④ Third, learning first-aid helps young people grow stronger in character. When a student practises calling 120 clearly or asking a partner, "Are you OK?", he or she builds calm and confidence. These are skills that travel far beyond medicine — to leading a team, to standing on a stage, to helping a frightened child cross a busy road. In short, **first-aid builds life-aid**.

⑤ Some teachers worry that first-aid lessons may take too much time away from maths, Chinese and English. This fear is understandable, but maybe exaggerated. A well-designed programme can use physical education periods and class-meeting hours. Schools can also invite the **Red Cross** or local hospitals to help once a month. Students will not lose their grades; in fact, many teachers in pilot schools report higher concentration after a hands-on first-aid week.

⑥ Of course, first-aid lessons are not a free ticket to dangerous behaviour. They are not about turning students into doctors. They are about giving ordinary young people the chance to do **ordinary good** in an unusual moment. I strongly believe that every middle

school in our city should add first-aid to its weekly timetable. A lesson of one hour today may become a life saved tomorrow.

根据短文内容，选择最佳答案。

1. What is the main question the writer discusses?

A. Whether hospitals are near every school.
B. Whether every middle school should teach basic first-aid.
C. Whether students can become professional doctors.
D. Whether physical education is more important than maths.

2. Why does the writer say students are often the "first and most important rescuers"?

A. Because students are stronger than adults.
B. Because hospitals are always closed on weekends.
C. Because in the first few minutes after an accident, the people nearby — often students — act first.
D. Because ambulances are forbidden in cities.

3. How does the writer answer the worry that first-aid takes too much time from key subjects?

A. He refuses to answer the question.
B. He suggests using PE periods and class-meeting hours, with help from Red Cross or hospitals.
C. He agrees that all maths lessons should be cut.
D. He asks students to study first-aid at home only.

4. What does "first-aid builds life-aid" MOST likely mean?

A. First-aid training turns every student into a paid helper.
B. First-aid skills also build calm, confidence and useful habits for life.
C. First-aid means throwing away all old lessons.
D. First-aid can replace sleep and food.

5. What is the writer's final view?

A. Only a few schools should try first-aid lessons.
B. First-aid lessons are dangerous for students.
C. Every middle school in the city should add first-aid to its weekly timetable.
D. First-aid lessons should replace all PE lessons.

答案与解析

1.
【答案】B
【题型】主旨大意题
【定位】第①段末句 "should every middle school teach basic first-aid..."
【解析】全文围绕是否应将急救列入必修课展开。A/C/D 均非核心问题。故选 B。

2.
【答案】C
【题型】细节理解题
【定位】第②段末句 "the people who are there — often ordinary students — are the first and most important rescuers."
【解析】事故发生头几分钟最先救援的往往是身边的学生。A 更强壮、B 医院周末关门、D 禁救护车都属无中生有。故选 C。

3.
【答案】B
【题型】细节理解题
【定位】第⑤段第3-4句 "use physical education periods and class-meeting hours... invite the Red Cross or local hospitals..."
【解析】用体育课/班会、并邀请红十字会或医院协助。A 不答、C 取消数学、D 在家学均不符。故选 B。

4.
【答案】B
【题型】词义猜测题
【定位】第④段上下文 "calm and confidence... leading a team, standing on a stage..."
【解析】"life-aid"在此指对整个人生有益的技能。A 付费助手、C 丢掉旧课、D 替代睡眠吃饭均不符。故选 B。

5.
【答案】C
【题型】主旨归纳/态度题
【定位】第⑥段末句 "every middle school in our city should add first-aid to its weekly timetable."
【解析】作者明确主张全市每所中学都应将急救纳入每周课表。A 仅少数学校、B 有危险、D 取代体育均非作者观点。故选 C。

词汇注释（超纲词）

- **first-aid** [n./adj.] 急救
- **curriculum** [n.] 课程
- **unconscious** [adj.] 不省人事的
- **exaggerated** [adj.] 夸张的
