阅读理解（应用文） Teen Science Fair 2027 — Call for Projects

Hello, young scientists!

Our city's biggest student-led science event, the **Teen Science Fair**, is open again! If you are in Grade 7, 8 or 9 in our city, we invite you to turn a question from your daily life into a simple experiment, and share it with hundreds of classmates, teachers, and families.

The slogan this year: **"A question is the first step of science."**

Key Dates

Stage	Date	What you do
Online entry opens	Mon, Aug 4, 2027	Register with a 200-word idea paper
Entry closes	Fri, Sept 26, 2027, 23:59	Final project title cannot be changed after this
Home preparation	Oct, 2027	Carry out your experiment and prepare a small poster
City Fair	Sat & Sun, Nov 8 — 9, 2027	Show your project in City Youth Hall
Awards	Sun, Nov 9, 2027, 16:00	Prizes on the Main Stage

Topics

You may choose any topic, but every project should answer **one clear question** and test it with a **simple experiment**. Some examples that passed last year:

- Does the shape of a paper plane change how far it flies?
- Does music help plants grow faster? (Basil vs silence vs pop songs)
- Can orange peel stop fruit from turning brown?
- Do phone cases really protect a phone in a 30 cm drop?
- Why does salt make ice melt faster? (Compared with sugar and sand)

Projects that do **not** fit the fair: political arguments; projects using live animals in painful ways; projects that need expensive lab tools students cannot fully understand.

What Every Project Needs

1. **A clear question** (one sentence).
2. **A short plan** (what you will change; what you will keep the same; what you will measure).
3. **At least three tests** of the same experiment (for fair results).
4. **A simple poster** (A1 size, 60 × 84 cm), including your name, class, question, plan, results (numbers or pictures), and a short conclusion.
5. **A 3-minute oral explanation** to the judges at your booth.

Rules

1. **Teams:** 1 to 3 students. Students in the same team must be from the same grade.
2. **Adult help:** parents and teachers may give ideas and help with safety, but the experiment must be done by the students themselves.
3. **Safety first:** no fire, no dangerous chemicals, and no electricity above 12 V. Protective glasses are provided for experiments that need them.
4. **Honesty:** write what really happened, even if the result is not the one you hoped for. "Unexpected" results often teach the most.
5. **Recycle:** please reuse paper boxes, old bottles, and empty jars where possible for your model.

Prizes

- **"Best Question" Award (3):** ¥500 book voucher each + an afternoon at the Science Museum lab.
- **"Best Poster" Award (3):** ¥300 voucher each + a printed interview in the City Youth Magazine.
- **"Clearest Explanation" Award (3):** ¥300 voucher each + a set of simple lab tools.
- **Everyone at the Fair:** a Teen Science Fair badge and a photo with the judges.

How to Enter

1. Go to www.teensciencefair2027.cn and fill in the online form.
2. Upload your 200-word idea paper as a PDF (not more than 2 MB).
3. A confirmation email will be sent within 2 working days.
4. If your team has any problem with the online form, visit the paper-entry desk at the Science Museum (Room 108) on Wednesdays and Fridays, 16:00 — 18:00.

Contact

- Organiser: City Science Museum, Youth Programmes Office

- Phone: 0571-8821-1108 (Mon — Fri, 10:00 — 16:00)
- Email: teen-fair@cityscience.cn
- WeChat: "TeenScienceFair2027"

A simple question, patiently tested, is science. We are waiting to see yours.

— Organising Committee, August 2027

根据文章内容，选择最佳答案。

1. When does online entry close?

A. Monday, August 4, 2027.
B. Friday, September 26, 2027, 23:59.
C. Sunday, November 9, 2027.
D. There is no closing date.

2. Which of the following is NOT a project that fits the fair?

A. Does orange peel stop fruit from turning brown?
B. Does music help plants grow faster?
C. Using live animals in painful ways to test pain medicine.
D. Does the shape of a paper plane change how far it flies?

3. How many students can be on one team, and what must they share?

A. Exactly 5 students, from different schools.
B. 1 to 3 students, all from the same grade.
C. Any number, from any school.
D. Only 1 student, no team allowed.

4. Xiao Ming's final result did not match his first guess. What does Rule 4 say he should do?

A. Change the result to match his guess.
B. Hide the result from the judges.
C. Write what really happened; "unexpected" results often teach the most.
D. Give up and not present the project.

5. What can a student who wins the "Best Question" Award receive?

A. ¥100 cash and a new backpack.
B. ¥500 book voucher and an afternoon at the Science Museum lab.
C. A mobile phone.
D. A free ticket to a concert.

答案与解析

1.
【答案】B
【题型】细节理解题
【定位】Key Dates 表 "Entry closes Fri, Sept 26, 2027, 23:59"
【解析】报名截止日期。A/C/D 均错。故选 B。

2.
【答案】C
【题型】细节理解题
【定位】Topics 段末 "projects using live animals in painful ways"
【解析】此类项目被排除。A/B/D 为合适话题。故选 C。

3.
【答案】B
【题型】细节理解题
【定位】Rules 第 1 条
【解析】1—3 人、同年级。A/C/D 均错。故选 B。

4.
【答案】C
【题型】细节理解题
【定位】Rules 第 4 条
【解析】诚实记录真实结果。A/B/D 均与规则相反。故选 C。

5.
【答案】B
【题型】细节理解题
【定位】Prizes 第 1 条
【解析】500 元代金券+实验室半日。A/C/D 均错。故选 B。

词汇注释（超纲词）

- **voucher** [n.] 代金券
- **basil** [n.] 罗勒
- **chemical** [n.] 化学品
- **recycle** [v.] 回收
- **protective** [adj.] 防护的
