阅读理解（应用文） Lihua Middle School Winter Science Fair 2027

Lihua Middle School · Science Department + STEM Club
2027 Winter Campus Science Fair — "Small Questions, Real Answers"
Every good scientist started as a student who asked one question twice.

Our Winter Science Fair is back for its **ninth year**. Between **Monday 29 November and Friday 3 December 2027**, Grade 7, 8 and 9 students will present their small, homemade science projects in the school sports hall. Every student is invited — as an exhibitor, as a volunteer, or simply as a visitor with a notebook and a curious question.

🧪 Three Kinds of Projects

Type A — Observation Project (single student or a pair).
Choose something **small** that can be watched carefully over 2–3 weeks: how fast a plant reaches for light; how the sound of a bell changes in a cold corridor; how a dumpling cools in different bowls. Record your notes, photos, or short videos.

Type B — Experiment Project (team of 3–4).
Ask a **real question**, make a prediction, test it, repeat the test, and note what went as expected — and what did not. Examples: "Which cloth keeps a cup of water warm longest?", "Does the way we fold a paper plane change its flight time?".

Type C — Design Project (team of 2–4).
Build a **small useful thing** that solves a tiny problem. Examples: a foldable desk-corner lamp from cardboard; a safer bell-rope for the lab; a warm-water reminder clip for old people.

📝 How to Enter

1. Choose one of the three types.
2. Fill in the one-page entry form (available outside Room 310, or on the school mini-app → STEM → Fair).
3. Submit the form to Mr. Lu, the STEM Club teacher, by **Friday 14 November, 18:00**.
4. Your form should include:
    - Project title (fewer than 15 words).

- One sentence about **the question** you are asking.
- Names, classes, and roles of your team.
- A rough plan for your 2.5 m × 1.0 m display table.

📝 Fair Week Timetable

Day	Time	What Happens
Mon 29 Nov	14:00 — 17:00	Teams set up their tables.
Tue 30 Nov	10:00 — 11:30	Grade 7 open hours (Grade 7 families welcome).
Wed 1 Dec	10:00 — 11:30	Grade 8 open hours.
Wed 1 Dec	14:00 — 15:30	Grade 9 open hours.
Thu 2 Dec	09:00 — 11:30	**Judging by six guest scientists** from the city university.
Fri 3 Dec	14:00 — 16:00	Public open hours + closing ceremony.

🎯 How You Are Judged (Out of 100)

Area	Weight
Clear question and plan	20
Careful method and honest data	25
Thinking and conclusions	25
Communication at the table (including a short 3-minute talk)	20
Teamwork and kind response to visitors	10

Important: judges **always prefer** a project that answers a small question well over one that tries to answer a big question poorly. "Why does my indoor bamboo grow faster at the west window?" is a better project than "How does the universe work?".

🛑 Safety and Fair Play

- **No open flames.** Use small LED lights and low-voltage batteries only.
- **No sharp glass** on table edges; ask the lab office for safer plastic containers.
- **No animals** brought to the hall (photos and videos are fine).
- All data must be **your own**. Copying results or pictures from the internet is an instant "no award".
- Chemistry experiments must have a **teacher's pre-approval signature** by 21 Nov.

🙋 Volunteers Needed

- **16 table guides** (4 per grade per day) — welcome visitors, keep the noise down.
- **6 timekeepers** on Judging Day — give each team a clear 3-minute signal.
- **4 photographers** — photos will be used, with permission, in the 2028 spring newsletter.
- **2 writers** — help write a short English-Chinese summary of each winning project, to be shared with our partner schools in Gansu and Yunnan.

Sign up at Room 310 by **Thursday 20 November**.

🥇 Awards (All Cert. + Small Prizes)

- **Golden Curiosity** (one project per grade, voted by the judges).
- **Most Honest Mistake** — the team whose "failed" test taught the audience the most.
- **Kindest Table** — voted by visitors, for the friendliest explanation.
- **Young Engineer** — best Type-C design project across the three grades.
- **Teachers' Choice** — a special award for a project that quietly impressed the staff.

> "A science fair is not a place where clever students show off. It is a place where **curious students help each other become slightly less wrong** about the world. We hope you leave the hall with more questions than you entered with."
> — *Mr. Lu, STEM Club, 7 November 2027*

注释： science fair 科学节；exhibitor 参展者；voltage 电压；approval 批准；curiosity 好奇心

根据通知内容，选择最佳答案。

1. How many project types can a student choose from?

A. One (only experiments).
B. Two (observation and design).
C. Three — Observation, Experiment, and Design.
D. Five.

2. By when must the entry form be submitted to Mr. Lu?

A. Mon 29 Nov, 14:00.
B. Thu 20 Nov, any time.
C. Fri 14 November, 18:00.
D. Fri 3 Dec, 14:00.

3. What message does the "Important" note under the judging table want to give?

A. A very big question will always get more marks.
B. Judges prefer a project that answers a small question well over one that tries to answer a big question poorly.
C. The universe question is the best project.
D. A project must have 10 pages of writing.

4. Which of the following is NOT allowed at the Science Fair?

A. Small LED lights and low-voltage batteries.
B. Plastic containers borrowed from the lab office.
C. Photos and videos of animals.
D. Copying data or pictures from the internet.

5. What is the main idea of Mr. Lu's closing quote?

A. Students should compete harder against each other.
B. A science fair is a place where curious students help each other become slightly less wrong about the world; the goal is to leave with more questions than you entered with.
C. Only clever students should join the fair.
D. Teachers already know all the answers.

答案与解析

1.
【答案】C
【题型】细节理解题
【定位】Three Kinds of Projects 段
【解析】A、B、D 均错。故选 C。

2.
【答案】C
【题型】细节理解题
【定位】How to Enter 第 3 条 "by Friday 14 November, 18:00"
【解析】直引。A、B、D 均错。故选 C。

3.
【答案】B
【题型】细节理解题
【定位】How You Are Judged 末段 Important 说明
【解析】小问题做好 > 大问题做烂。A、C、D 均错。故选 B。

4.
【答案】D

【题型】细节理解题（否定）
【定位】Safety and Fair Play "Copying results or pictures from the internet is an instant 'no award'"
【解析】抄袭禁止。A、B、C 均合规。故选 D。

5.
【答案】B
【题型】推理判断题
【定位】结尾 Mr. Lu 引言
【解析】科学节本质与学习态度。A、C、D 均偏离。故选 B。
