11-15 第2篇

阅读理解（应用文） Winter Energy-Saving Week — "One Week, A Thousand Small Switches"

Lihua Middle School · Student Union + General Affairs Office
2027 Winter Energy-Saving Week: Mon 24 Nov — Fri 28 Nov 2027
Theme: "One Week, A Thousand Small Switches."
Nothing big. Nothing loud. Just a lot of small ones.

Every winter the school's electricity and hot-water bills rise sharply — partly because we do need more warmth and light, partly because old habits stay with us from October. Last winter, our electricity use in December was **42% higher** than in October. We cannot stop the cold weather; but we can, together, save a thousand small watts. From **Monday 24 November**, Lihua will hold its seventh Winter Energy-Saving Week.

🔆 Six Quiet Rules for the Week

1. **"Last Out, Lights Off."** The last student leaving a classroom or lab switches off lights, fans, and the projector. A small green sticker is already on every door frame as a reminder.
2. **"One Window Only."** During the morning break, open one window, not four; cross-winds waste more heat than they refresh.
3. **"Warm Water, Not Hot."** The corridor hot-water tank will be set to **60 ℃** instead of 90 ℃. Still safe for tea, less wasteful.
4. **"Seven-Minute Shower"** in the PE changing room (a small timer is by the door).
5. **"Stairs for 1—3 Floors."** Use the lift only when going to the 4th floor or higher, or when carrying something heavy. (Teachers and the school nurse may use the lift any time.)
6. **"Device Sleep at 18:00."** All office computers and classroom screens enter sleep mode automatically. Students who stay late for study should ask the form teacher for a key.

📚 Four Small Activities

Activity A — Class Meter Reading (all classes, Mon & Fri).
At 07:55 on Monday and 17:00 on Friday, two students from each class read the **small electricity meter** outside their classroom and fill in the form on the door. The class with the **lowest increase** from morning to Friday afternoon will win the "**Green Classroom**" flag for December.

Activity B — Long-Sleeve Tuesday (Tue 25 Nov).
Instead of turning up the heater, wear **one more warm layer** on Tuesday. We save 2 °C worth of electricity across the whole school if 80% of us wear a light sweater or thermal undershirt.

Activity C — Photo Wall "Yes or No?" (Wed 26 Nov).
The Student Union will put up a photo wall outside the library. Each photo shows a small winter moment (a running tap, a lamp left on, a half-open window, a phone charger in an empty plug). Students vote with a small red or green sticker: **"wasteful or wise?"** Voting teaches seeing.

Activity D — Family Letter (any day this week).
Every student writes one short letter to take home on Thursday 27 Nov. The letter may share **one small idea** a family could try that evening — unplugging a phone charger, using a dust-cover on the TV, or lowering the night heater by 1 °C.

🎒 What Students Should NOT Do

- **Do not** turn off the heater in another classroom that is still being used — leave it to that class.
- **Do not** cover the electricity meter or climb on a chair to reach it.
- **Do not** unplug the lab equipment that has the yellow "**Do-Not-Unplug**" label.
- **Do not** open classroom windows in the early morning before the temperature inside warms up — it wastes more than it helps.
- **Do not** shame any classmate who forgets a rule. We are building a habit, not a fear.

🏁 Closing Ceremony (Fri 28 Nov, 16:20, Sports Hall)

- The "Green Classroom" flag will be given to the class with the lowest energy increase.
- Four student volunteers will read their **family letter** aloud, in both Chinese and English.
- The PE Department will announce the **total electricity saved** in kWh, and the General Affairs Office will tell us how many **small trees** that amount of electricity could have planted.

- All students take away a small paper bookmark printed with the six quiet rules — to stick inside the cover of their homework book.

🙋‍♀️ Volunteers Wanted (26 students)

- **6 meter readers** (trained once by the caretaker on Friday 21 Nov).
- **6 photo-wall helpers** (cut photos, print small red/green stickers, tidy votes).
- **4 letter writers** (help younger students phrase their family letters in clear Chinese-English).
- **4 sports-hall set-up helpers** for the closing ceremony.
- **6 corridor cheerers** who greet classmates at the morning door with "Have you switched off the light?"

Sign-up form: outside Room 112, by **Thu 20 November, 17:30**.

> "Saving energy in a school is not a race between us and the electric bill. It is a quiet conversation between our year now and our winters later. Each small switch is a tiny promise to a tree that has not yet been planted."
> — *Student Union & General Affairs Office, 15 November 2027*

注释： energy-saving 节能；meter 电表；kWh 千瓦时；thermal undershirt 保暖内衣；caretaker 后勤员

根据通知内容，选择最佳答案。

1. What does "Last Out, Lights Off" mean?

A. Only the teacher may switch off lights.
B. The last student leaving a classroom or lab switches off lights, fans, and the projector.
C. All lights stay on at night.
D. Students should always leave lights on.

2. On which day does the school hold "Long-Sleeve Tuesday"?

A. Monday 24 November.
B. Tuesday 25 November.
C. Wednesday 26 November.
D. Friday 28 November.

3. Which of the following is NOT allowed this week?

A. Reading the classroom electricity meter.
B. Turning off the heater in another classroom that is still being used.

C. Wearing a warm layer instead of turning up the heater.
D. Unplugging your own phone charger.

4. How will the "Green Classroom" flag be decided?

A. By a teacher's random choice.
B. By how many students attend the closing ceremony.
C. By which class has the lowest increase in its electricity meter from Monday morning (07:55) to Friday afternoon (17:00).
D. By who has the best decoration.

5. Which sentence best describes the spirit of the Student Union's closing message?

A. Saving energy is a contest to beat the electric bill.
B. Saving energy in a school is a quiet conversation between our year now and our winters later; each small switch is a tiny promise to a tree that has not yet been planted.
C. Saving energy is a burden students should avoid.
D. Saving energy is unrelated to the future.

答案与解析

1.
【答案】B
【题型】细节理解题
【定位】Six Quiet Rules 第 1 条
【解析】规则直引。A、C、D 均错。故选 B。

2.
【答案】B
【题型】细节理解题
【定位】Activity B 段日期
【解析】日期直引。A、C、D 均错。故选 B。

3.
【答案】B
【题型】细节理解题（否定）
【定位】What Students Should NOT Do 第 1 条
【解析】禁止关他班暖气。A、C、D 均合规。故选 B。

4.
【答案】C
【题型】细节理解题
【定位】Activity A + Closing Ceremony
【解析】评选规则直引。A、B、D 均错。故选 C。

5.

【答案】B

【题型】推理判断题

【定位】结尾 Student Union 与 General Affairs Office 引言

【解析】主题凝练。A、C、D 均偏离。故选 B。
