参考范文

Good morning, everyone! Today's topic is "Will AI replace teachers?"

AI is already being used in education. For example, smart apps can correct our homework, recommend learning materials and even answer simple questions. Some students use AI tools to practise English speaking at home.

However, I don't think AI can fully replace teachers. A teacher does much more than deliver knowledge. Teachers encourage us when we fail, share life experiences and understand our feelings. A machine cannot give a warm hug or a patient smile when we are struggling.

I believe the best future is one where AI and teachers work together. AI handles repetitive tasks while teachers focus on inspiring, guiding and caring for students.

Technology can help, but only a human heart can truly educate.

Thank you!

全文翻译

大家早上好！今天的话题是"AI会取代老师吗？"

AI 已经在教育中得到应用。例如，智能应用可以批改作业、推荐学习材料，甚至回答简单问题。有些同学在家用 AI 工具练习英语口语。

然而，我认为 AI 无法完全取代老师。老师做的远不止传授知识。老师在我们失败时鼓励我们，分享人生经验，理解我们的感受。当我们在挣扎时，机器无法给予一个温暖的拥抱或耐心的微笑。

我相信最好的未来是 AI 与老师合作。AI 处理重复性任务，而老师专注于激励、引导和关爱学生。

技术能帮忙，但只有人心才能真正教育人。

谢谢！

升格建议（3条）

建议	普通表达	升格表达
应用	AI can correct homework.	AI can mark a thousand papers in a second, but it cannot notice the one student who is silently struggling.
不能取代	AI can't replace teachers.	A teacher's influence reaches far beyond the classroom — it shapes who we become.
未来	AI and teachers should cooperate.	The future classroom will be a place where the speed of technology meets the warmth of the human touch.
