08-12 第1篇

中考英语完形填空：参观科技馆

完形填空原文

Our class went on a trip to the Science Museum last month. We were all excited because we had studied many science topics in our textbooks, and now we could see them come to ***1***.

The museum was a large modern building. When we entered, we saw a huge model of the solar system hanging from the ceiling. The planets moved slowly around the sun. I had learned about this in class, but seeing it with my own eyes was much more ***2***.

Our guide took us to the first floor, which was about human inventions. We saw old telephones, the first computers, and many other machines. I was ***3*** by how technology had changed over the years. The first computer was as big as a room, but now we hold tiny smartphones in our hands.

On the second floor, there was an experiment area. We could touch and try some of the exhibits. I tried a machine that showed how electricity works. I turned a handle, and a small light bulb lit up. It was amazing to see the ***4*** between my action and the result. My classmate Lin Tao tried a balance board. He had to stand in the right position to keep the board level. He kept failing at first, but after several ***5***, he succeeded. We all cheered for him.

The most interesting part was the robot section. A robot could solve a Rubik's cube in less than a minute. It moved so fast that our eyes could barely ***6*** it. Another robot could draw pictures. We gave it a photo of our teacher, and it drew a cartoon version. We laughed when we saw the ***7***.

Before we left, we watched a short film about space exploration. It showed how astronauts live and work on the space station. The film made me ***8*** about the future. Maybe one day I could work in science and help discover new things about our world.

The trip to the Science Museum was both fun and educational. I learned that science is not just in books — it is all around us. I hope to visit again and ***9*** more. The museum often has new exhibitions, so each visit can bring new ***10***.

选项

1. A. life　　B. school　　C. mind　　D. rest
2. A. difficult　　B. impressive　　C. boring　　D. expensive

3. A. worried B. tired C. amazed D. angry
