He had been cycling to school for a year and gave me some useful tips. "Avoid the main road during rush hour if you can," he said. "The small streets are quieter and safer."

When I arrived at school, I felt a great sense of ***6***. I had completed my first solo bike ride! I locked my bike in the school yard and ran to my classroom. My friends asked how my ride was. "It was wonderful!" I said. "I think I will ride every day from now on."

Cycling to school has many ***7***. It helps me wake up in the morning and saves bus fare. It is also good for the environment. Best of all, I feel more independent. I don't need to ***8*** on my parents to take me to school anymore.
