中考英语完形填空：参加数学竞赛

完形填空原文

Last month, I took part in a city-wide mathematics competition. It was my first time participating in such an event. I had always enjoyed maths and was good at it, but I knew the competition would be ***1***. Many excellent students from different schools would be there.

I spent two weeks preparing for the competition. Every day after school, I would ***2*** extra maths problems. My maths teacher, Mr. Wang, gave me some past papers and taught me some problem-solving skills. He said the key was not to memorize formulas but to understand the ***3*** behind each problem.

On the day of the competition, I woke up early. I felt both excited and nervous. My mother made me a good breakfast and said, "Just do your best. The ***4*** is not the most important thing. What matters is that you try." Her words made me feel better.

The competition was held in a large hall. There were about two hundred students. When the paper was handed out, I took a deep breath and began. The first few questions were not too difficult. I solved them ***5***. But then I met a problem that I couldn't figure out. I spent a long time on it and almost gave up. Then I remembered Mr. Wang's advice: "When you're stuck, try to look at the problem from a ***6*** angle." I tried a different method and finally found the answer.

When the results came out a week later, I had won a second prize. I was very happy, though not completely ***7***. I knew I could have done better on that difficult problem if I had had more time. But my parents and teachers were proud of me. They said that taking part was more important than winning.

The competition taught me many things. I learned that preparation is important, and so is staying calm under ***8***. I also learned that there are always smarter people than us, and we should learn from them. Most importantly, I learned to enjoy the process of ***9*** challenges rather than only focusing on the result.

I will continue to work hard on maths and maybe take part in more competitions in the future. Each competition is a chance to ***10*** ourselves and grow.
