中考英语完形填空：做纸飞机比赛

完形填空原文

Last Thursday, our PE teacher organised a paper plane competition for our grade. He said it would be fun and would also teach us about the basic ***1*** of flight. We were all excited and could not wait to start.

First, we had to make our own paper planes. The teacher showed us different folding methods. Some planes were designed to fly far, others to fly for a long ***2***. I chose to make a plane that could fly straight and far. I folded the paper carefully, making sure each fold was sharp and even. A small mistake could ***3*** the plane's flight.

When we finished making our planes, we went to the playground. The weather was perfect — sunny with a gentle breeze. We lined up and took turns to throw our planes. The rule was simple: the plane that flew the ***4*** would win.

My first throw was not very good. The plane turned to the side and landed after only a few metres. I was a little ***5***. But I watched how other students threw their planes. Some threw with more force, others threw at a certain angle. I learned that the way you throw ***6*** a lot.

I adjusted my plane slightly and tried again. This time I threw it at a slight upward angle with a smooth motion. The plane flew straight and glided through the air. It landed about fifteen metres away! I was so happy. ***7***, it wasn't the longest flight — a boy from Class 3 won with twenty metres. But I had improved a lot from my first try.

The competition was not only about winning. We had a great time together. We laughed when some planes flew in ***8*** directions or made funny loops. The teacher said that sometimes the process of trying and learning was more valuable than the result.

I enjoyed the paper plane competition very much. It reminded me that we can have fun with ***9*** things. We don't always need expensive toys or equipment. A piece of paper, some creativity, and a willingness to try can bring us joy. I might even make paper planes at home and ***10*** with my younger brother. Who knows? We might hold our own family competition!
