参考范文

Technology is changing our world at an incredible speed. I believe that in the near future, self-driving cars will become part of everyday life.

Imagine stepping into a car, saying your destination and then reading a book or having breakfast while the car drives itself. There will be fewer accidents because computers don't get tired, distracted or emotional. Traffic flow will also improve because self-driving cars can communicate with each other to avoid jams.

However, I do have some concerns. If machines do everything for us, will we become too dependent on technology? What about the millions of drivers who might lose their jobs?

In my opinion, technology should serve people, not replace them. We need to develop new inventions responsibly and make sure they benefit everyone, not just a few. The future belongs to those who use technology wisely.

全文翻译

科技正以难以置信的速度改变着我们的世界。我相信在不久的将来，自动驾驶汽车将成为日常生活的一部分。

想象一下：走进一辆车，说出目的地，然后在车自动行驶时看书或吃早餐。事故会更少，因为电脑不会疲劳、分心或情绪化。交通流量也会改善，因为自动驾驶汽车可以彼此通信来避免拥堵。

然而，我确实有些担忧。如果机器为我们做一切，我们会不会过度依赖科技？那些可能失去工作的数百万司机怎么办？

在我看来，科技应该服务于人，而不是取代人。我们需要负责任地开发新发明，确保它们惠及每一个人，而不仅仅是少数人。未来属于那些明智使用科技的人。

升格建议（3条）

建议	普通表达	升格表达
想象	Cars will drive themselves.	Picture a morning where your car knows your schedule, picks your favourite playlist and delivers you to school while you finish last night's homework.
担忧	We might rely on technology too much.	If we let machines think for us, we risk building a future where humans have everything but have forgotten how to do anything.
看法	Technology should help us.	Technology is a powerful horse — we must hold the reins, or it will decide where we go.
