## 参考范文

Dear schoolmates,

Water is essential to life, but it is not unlimited.

Although 70% of the earth's surface is covered by water, only about 1% of it is fresh water available for daily use. In many parts of the world, people still don't have access to clean drinking water. Even in China, some areas face serious water shortages, especially in the north and west.

Here is what we can do every day. First, turn off the tap while brushing your teeth — this alone can save litres of water each month. Second, take shorter showers. Five minutes is enough to get clean. Third, report any leaking taps or pipes at school immediately.

Water seems free, but it is priceless. Every drop we save today is a gift to future generations.

Let's turn off the tap and turn on our awareness. Save water, save life!

# 全文翻译

亲爱的同学们，

水对生命至关重要，但它不是无限的。

虽然地球表面70%被水覆盖，但只有约1%是可供日常使用的淡水。世界上很多地方的人还无法获得干净的饮用水。即使在中国，一些地区也面临严重的缺水问题，尤其是北方和西部。

以下是我们每天都能做的事。第一，刷牙时关掉水龙头——仅此一项每月就能节省好几升水。第二，缩短淋浴时间。五分钟足以洗干净。第三，在学校发现漏水的水龙头或水管要立即报告。

水看似免费，却是无价之宝。今天我们节省的每一滴水都是送给后代的礼物。

让我们关掉水龙头，打开我们的意识。节约用水，守护生命！

李华
